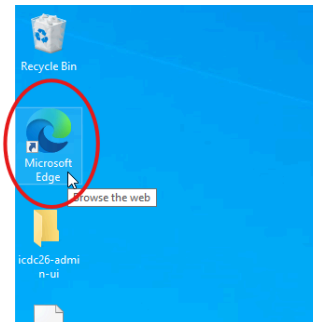
Administration of Management Backend and WWW via RDP

Public Website

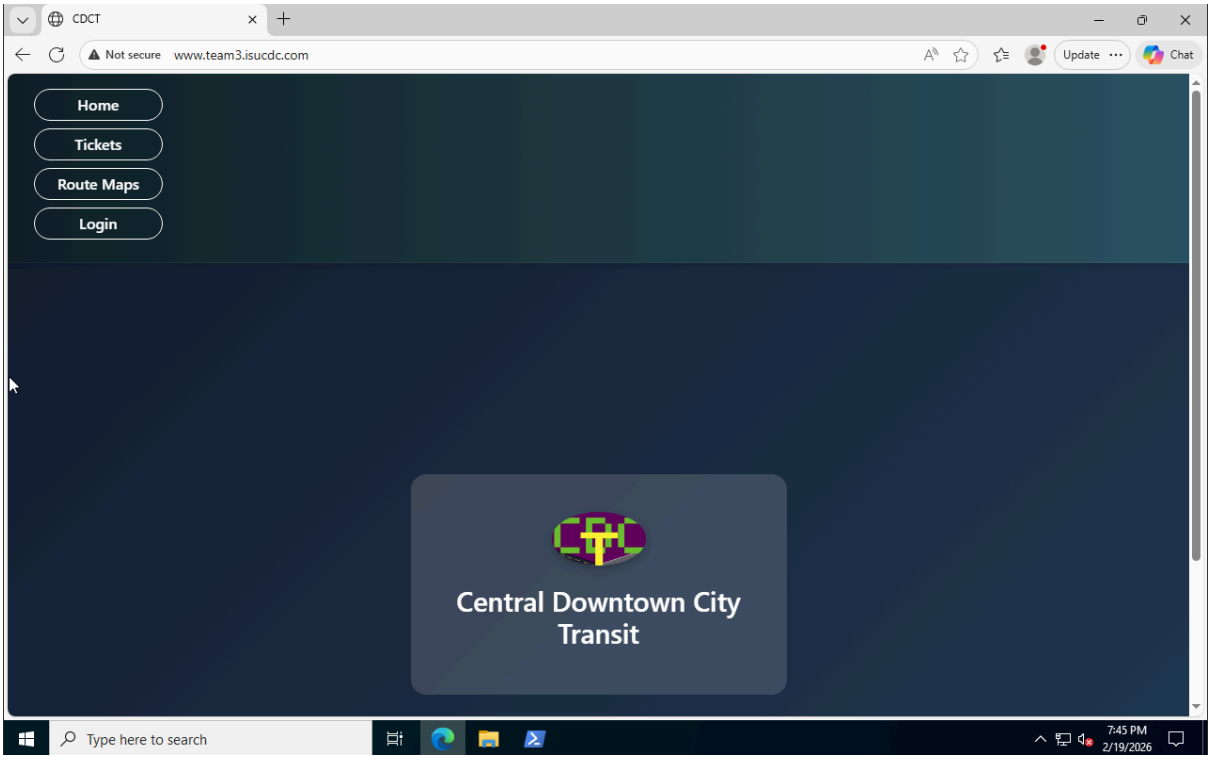
* For any issues with the public website contact - ###-###-####

Access the Public Website

1. Follow the steps here to start a RDP session.
2. Next, open up a browser. Open up either Edge, Chrome, or Firefox from the desktop by double-clicking the browsers icon. If they are not on the desktop, hit the Windows key and search for either Edge, Chrome, or Firefox. The application will appear just below the search box.

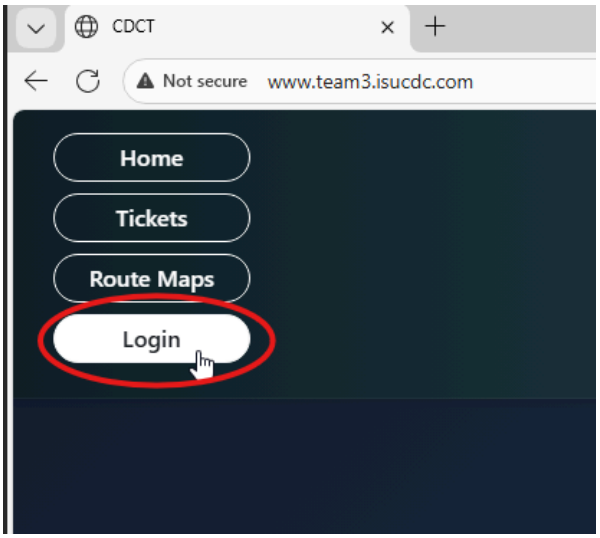


3. In the address bar, type "http://www.team3.isucdc.com".
4. This will take you to the main page of the public website.

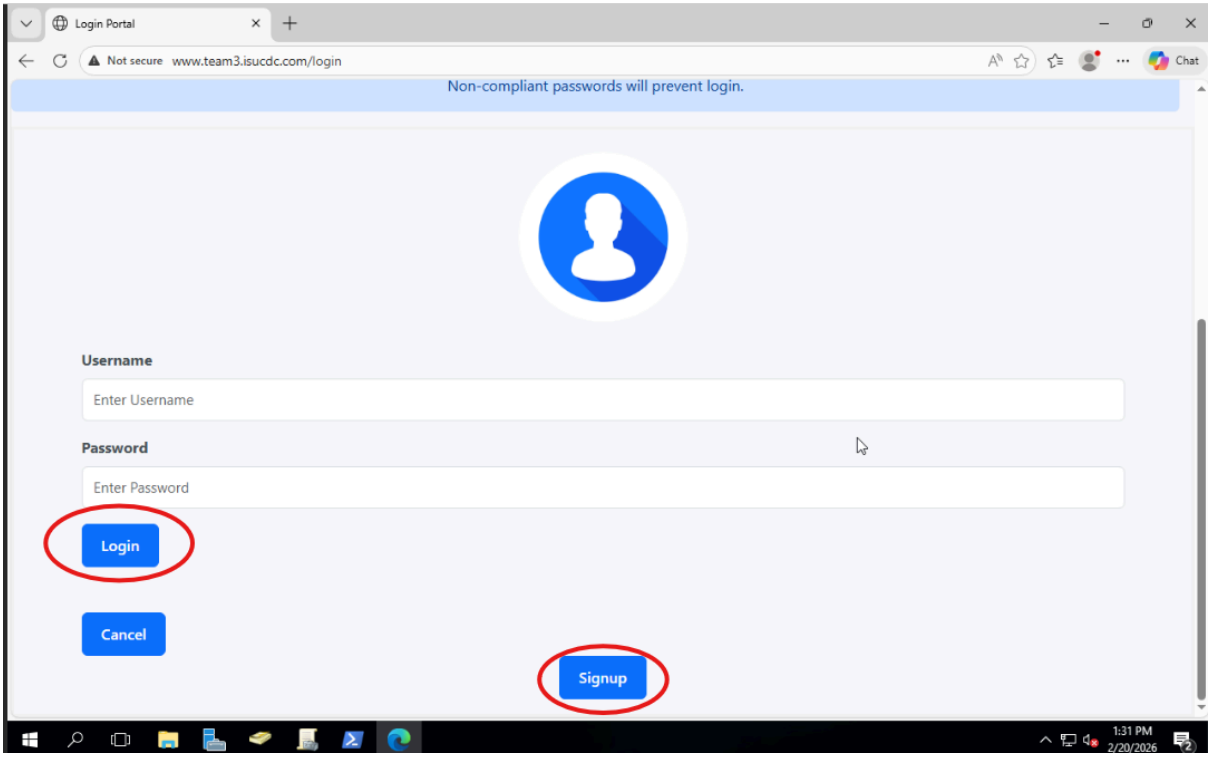


Login to the Public Website

1. From the main page of the public website click the Login button on the upper left hand side.



2. On the login screen, enter your username and password and click login.

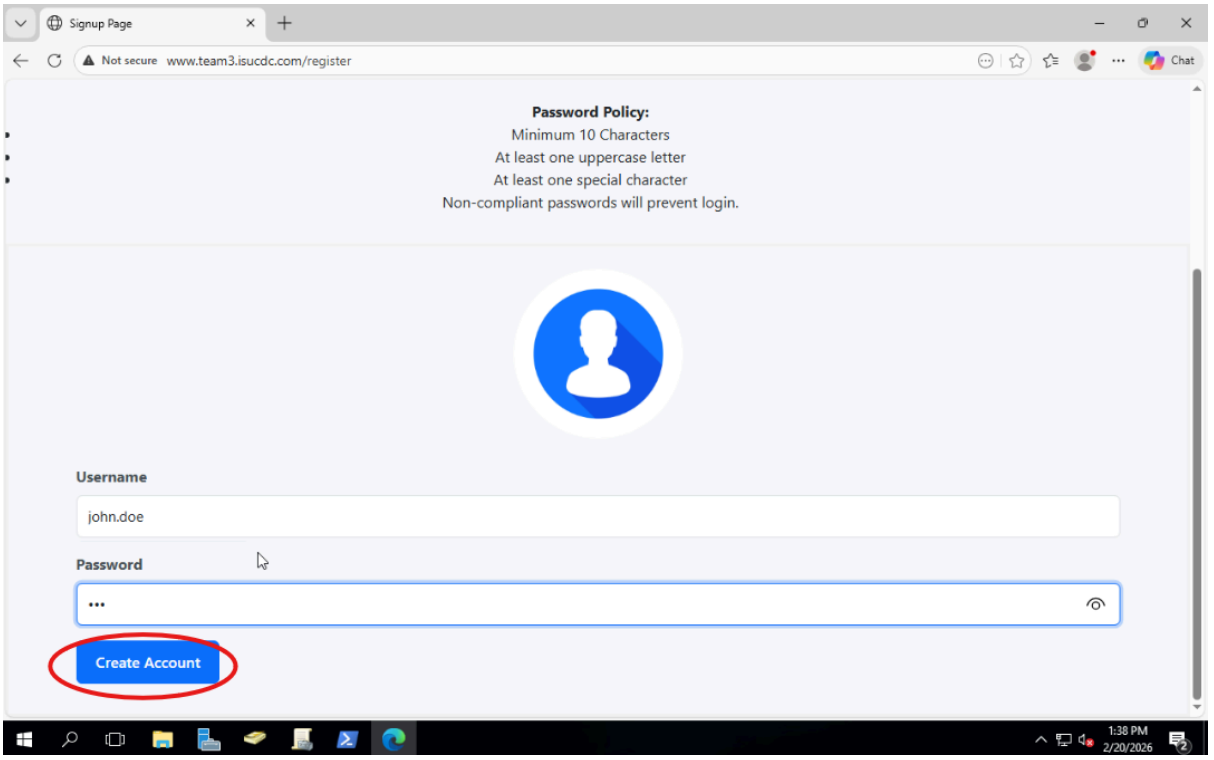


3. If you do not have an account follow the steps below to create one.

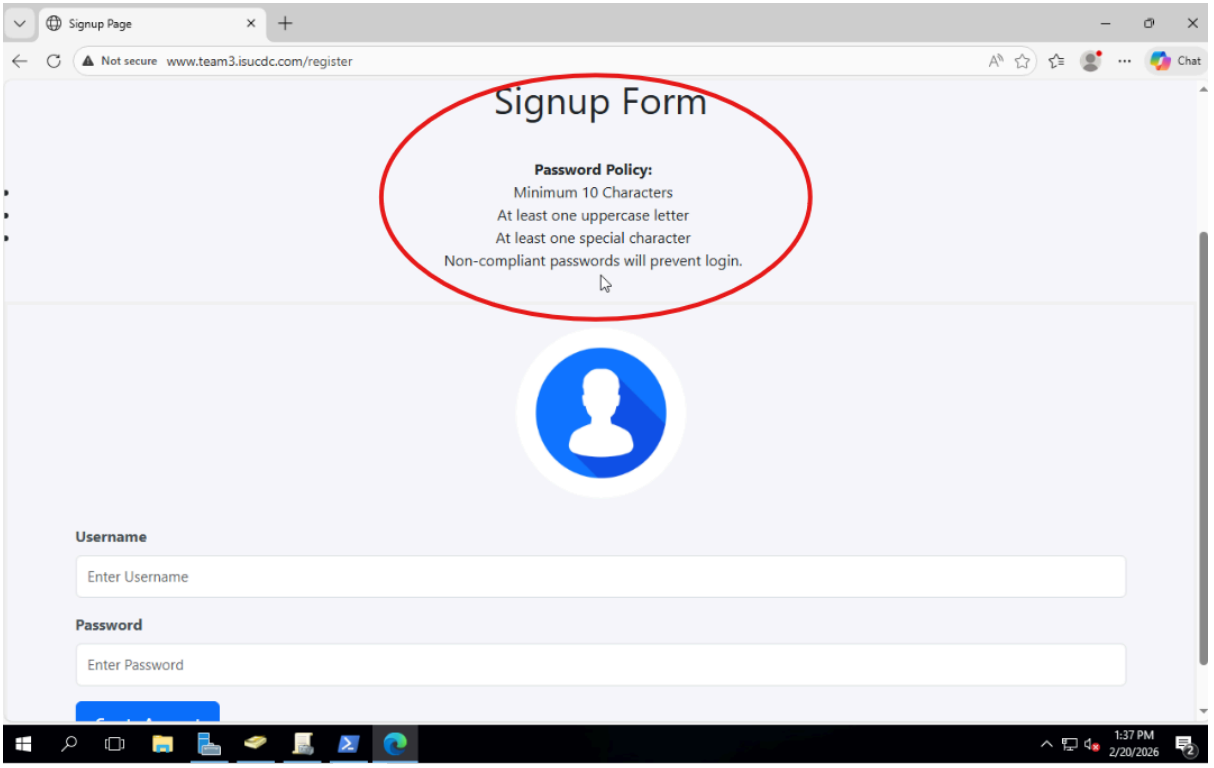
Sign Up for the Public Website

1. Follow the steps above to reach the login page of the website.
2. Next click the Signup button. This will take you to the Signup page.
3. Enter a username and password. Usernames must be unique and not contain spaces. Passwords must be at least 10 digits and contain an uppercase letter,

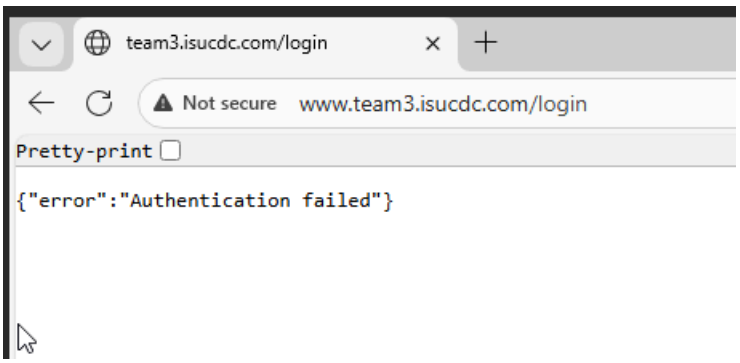
lowercase letter, a number, and a special character.



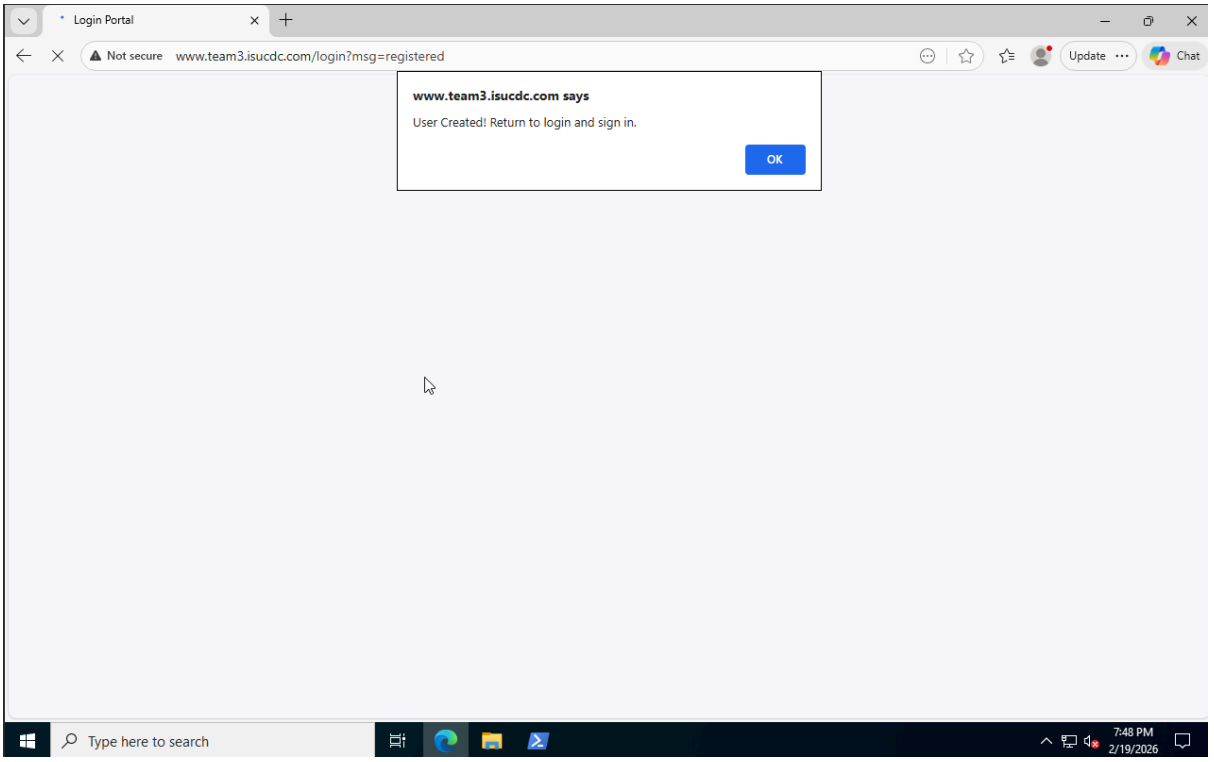
4. If your password does not meet the requirements or your username is not unique it will display the following error.



5.



6. A successfully created user will look like this.

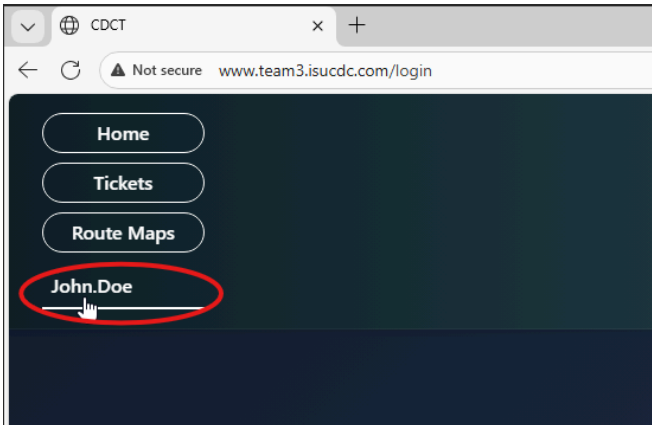


7. After you have successfully created your user follow the steps here to login to the website.

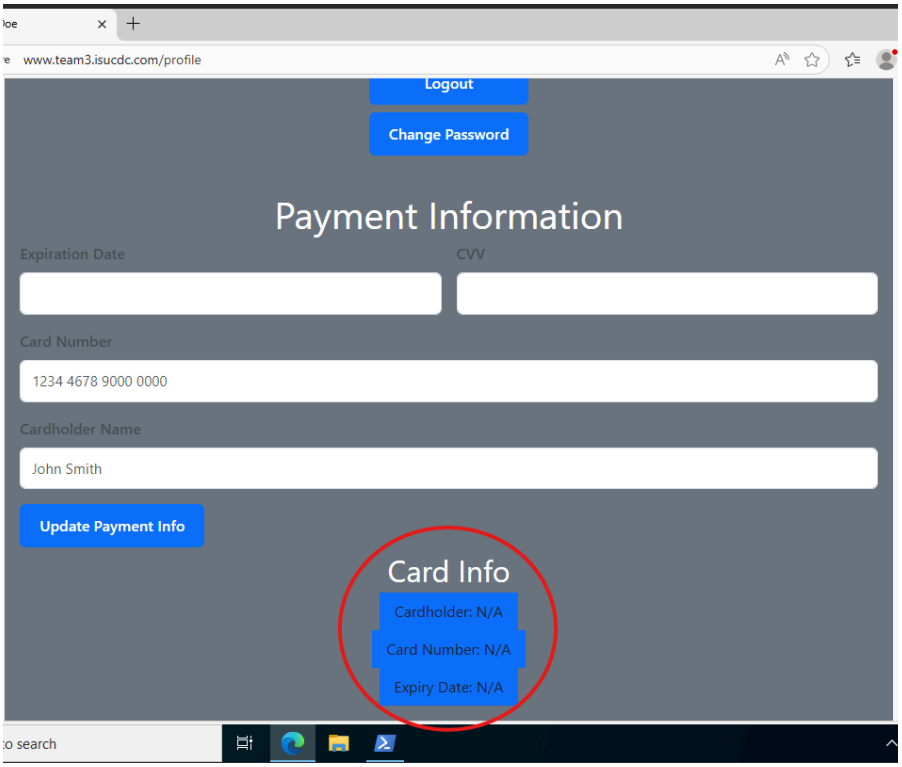
Viewing and Updating Payment Information on the Public Website

1. If you are not already logged in follow the guide here to login.

2. Next, in the right hand corner click your name.



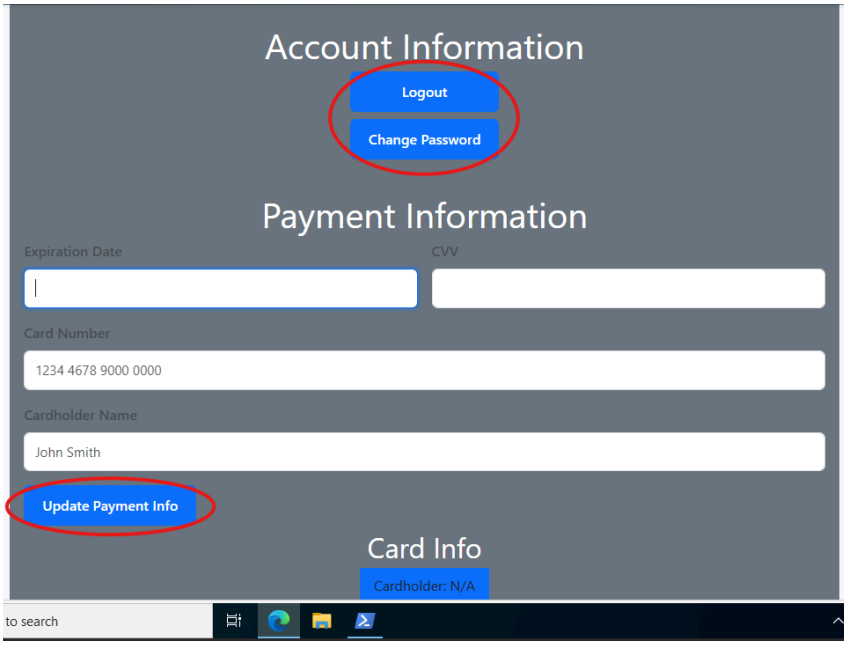
3. This will take you to a page where you can scroll down and view your card information.



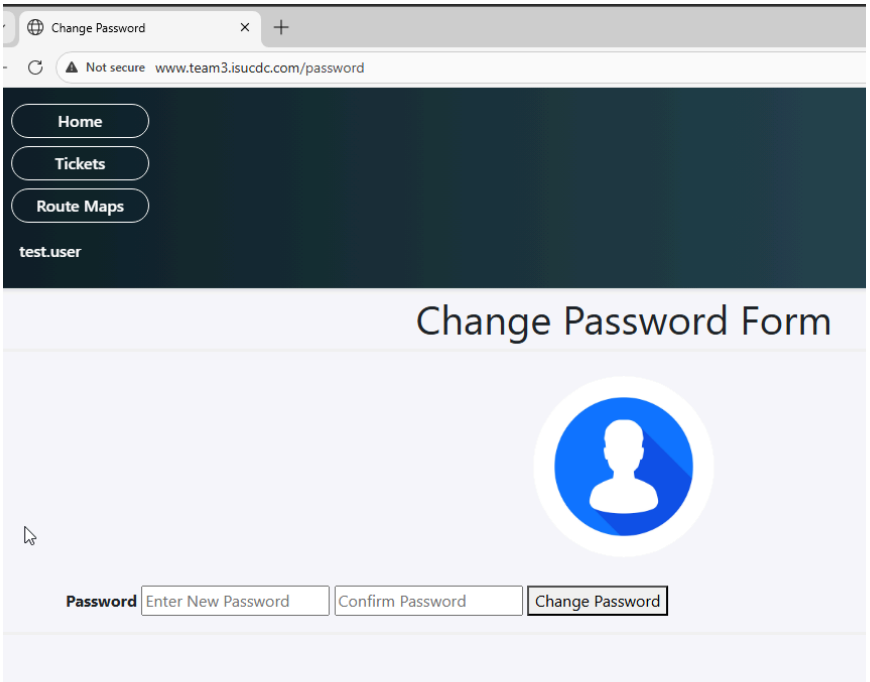
4. To update your card information enter your expiration date, CVV, card number, and cardholder name into the form. The CVV is the 3 digit number often found on the back of your card.
5. Then click Update Payment Info. This will update your payment information.

Changing a User's Password on the Public Website

1. If you are not already logged into the website, follow the steps here to login.
2. Then follow the steps from here to view your account information.
3. On the Account Information page of the website, click the Change Password button.

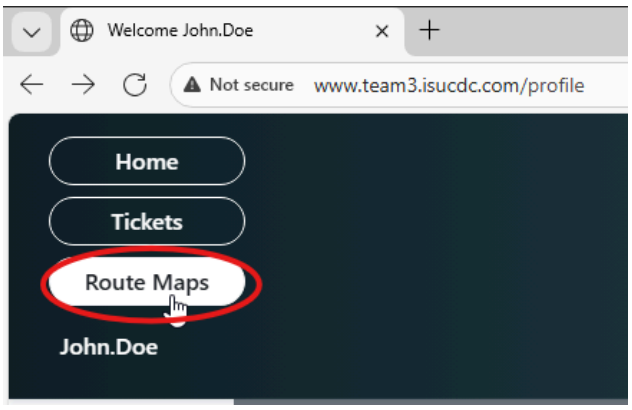


4. Enter a new password then re-enter the password to confirm it.
5. Then click Change Password to confirm the change.

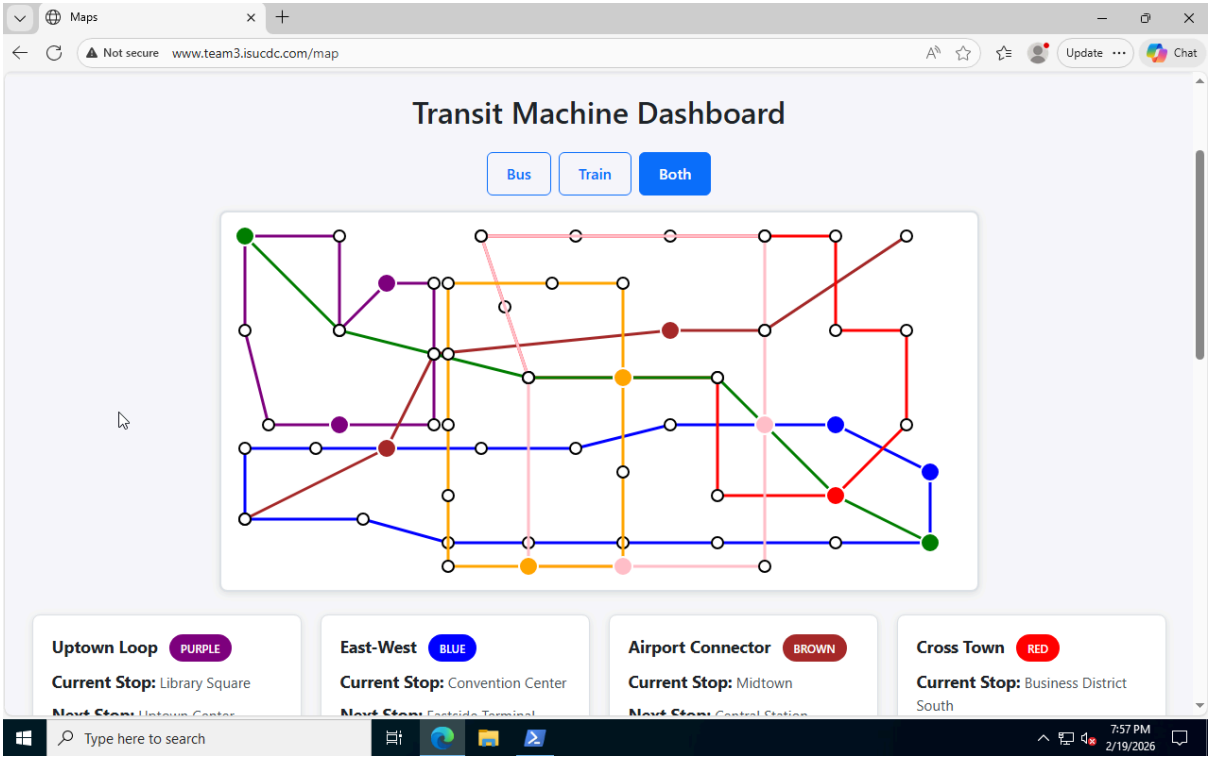


Viewing Route Maps on the Public Website

1. If you are not already on the public website, follow the steps on here to access it.
2. Then in the right hand corner click Route Maps. This will allow you to view the Transit Machine Dashboard.

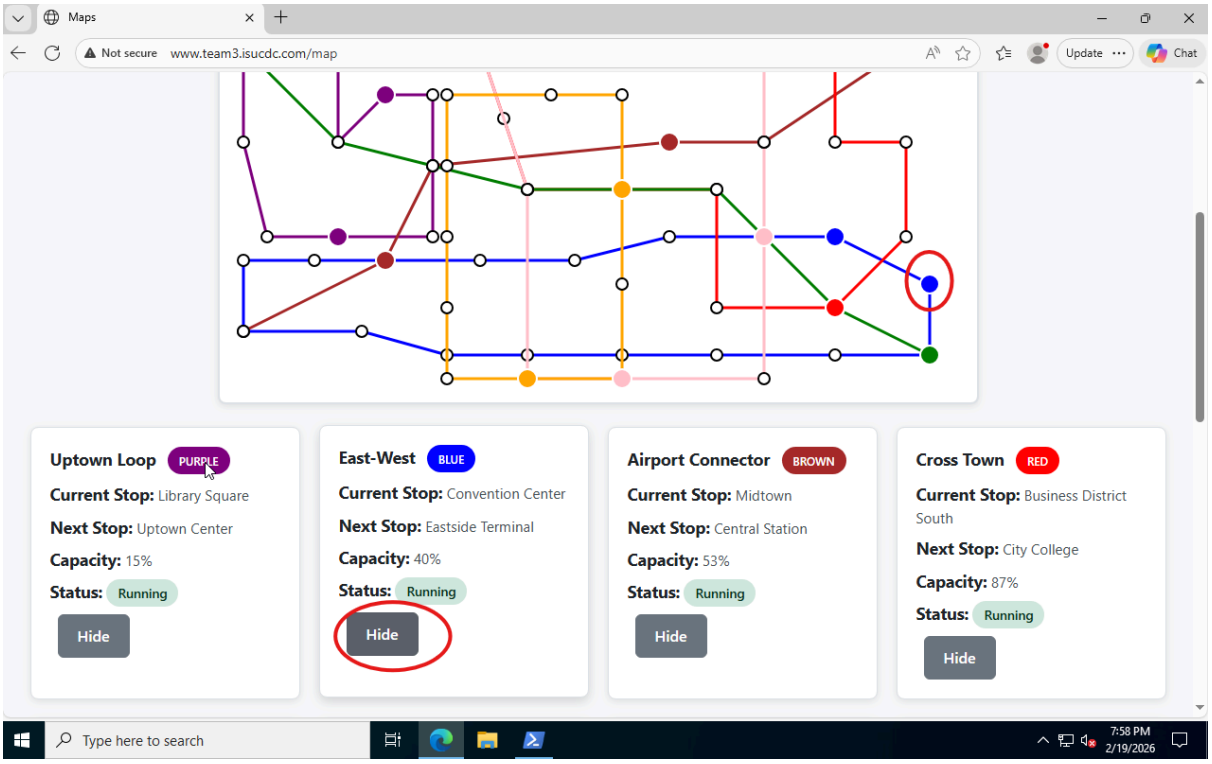


3. On this page you can view the routes for trains, buses, or both at the same time by clicking the blue buttons at the top.

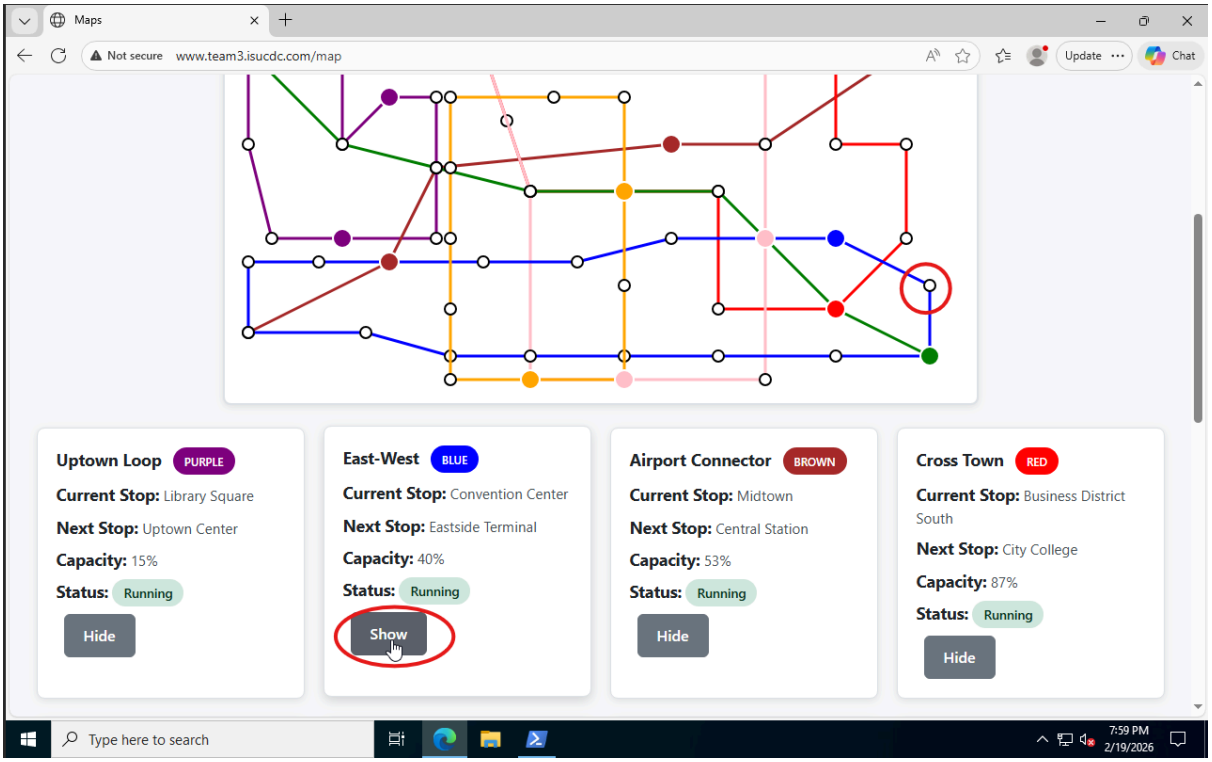


4. If you scroll down you can see more information about each route. Here you can see the route names, the current stop, the next stop, the capacity of the bus or

train, and whether the route is currently running or not.

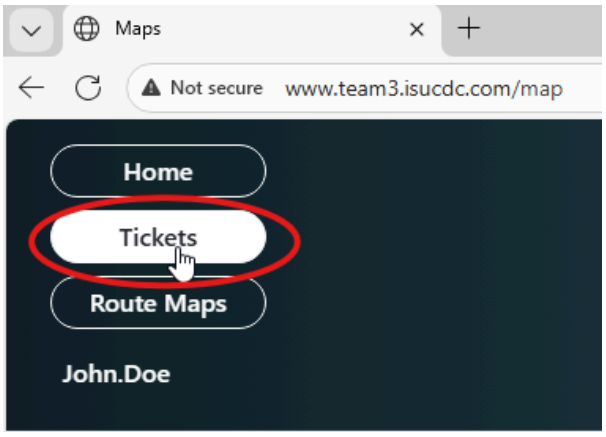


5. To filter which routes the map shows, you can click the hide button on a route. This will hide it on the map so that only the routes you would like to see are showing.
6. If you would like to see a route that was hidden. Click show on the route. This will re-add the route to the transit map.

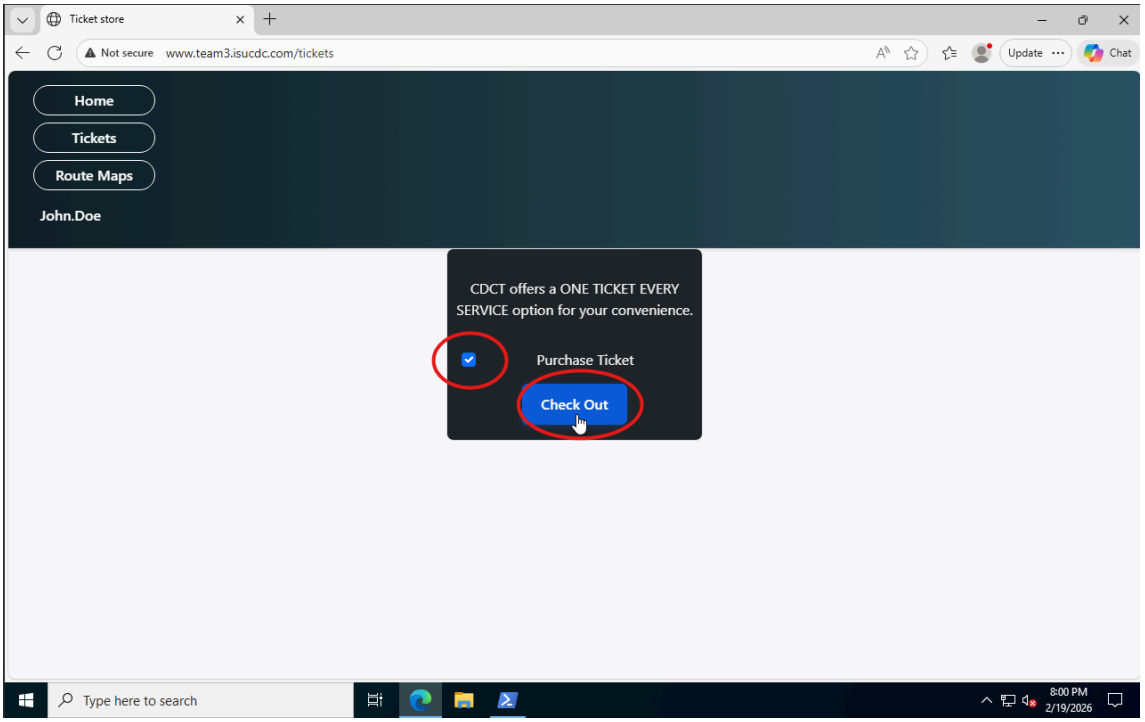


Purchasing a Ticket From the Public Website

1. First, follow the steps on here to access the public website.
2. Next, follow the steps on here to login to the public website.
3. Once you are logged in click the Tickets button in the right hand corner of the screen.



4. This will take you to the screen below. The CDCT offers one ticket every service option. To purchase this ticket check the box to the right of the purchase ticket then check out. To purchase a ticket your payment information must be updated. To update your payment information follow the steps on here.



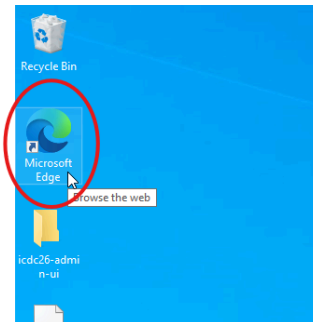
5. This will take you to the tickets website where you can purchase tickets.

Admin Website

* For any issues with the Admin website contact - ###-###-####

Accessing the Admin Website

1. Follow the steps here to start a RDP session.
2. Next, open up a browser. Open up either Edge, Chrome, or Firefox from the desktop by double-clicking the browsers icon. If they are not on the desktop, hit the Windows key and search for either Edge, Chrome, or Firefox. The application will appear just below the search box.

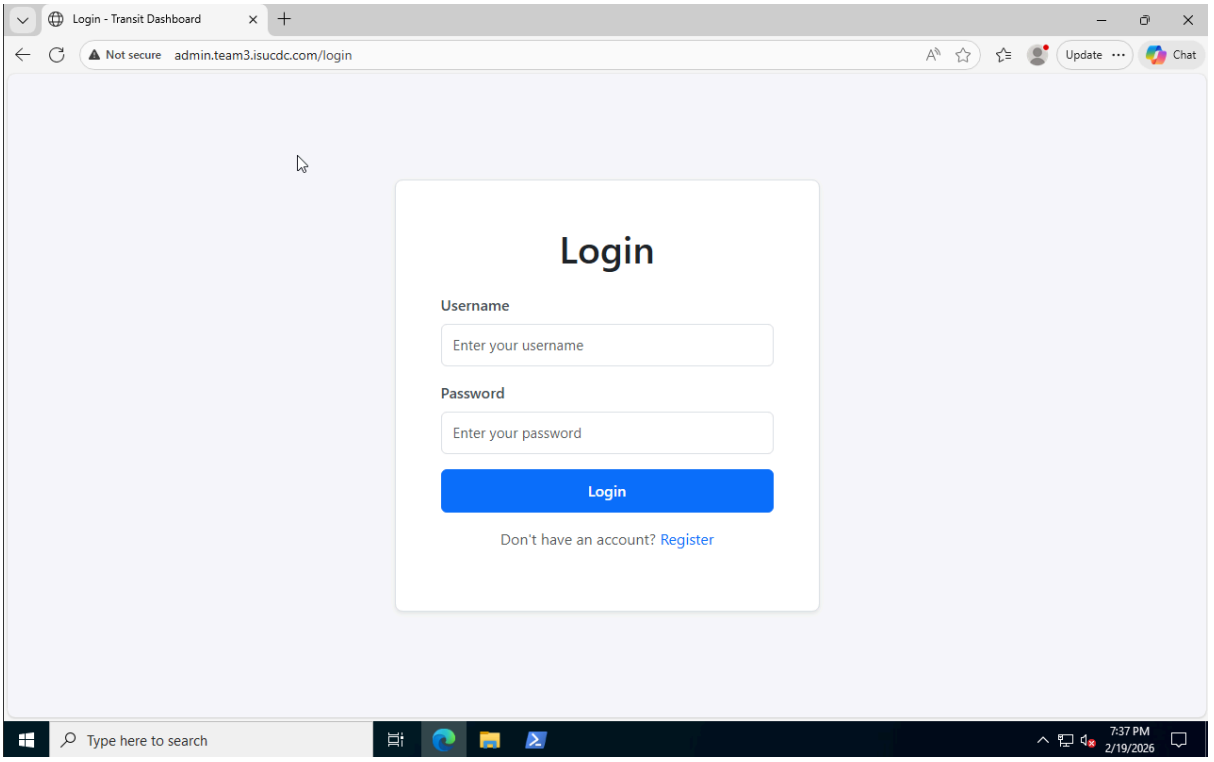


3. In the address bar, type "http://admin.team3.isucdc.com". This will take you to the admin website.

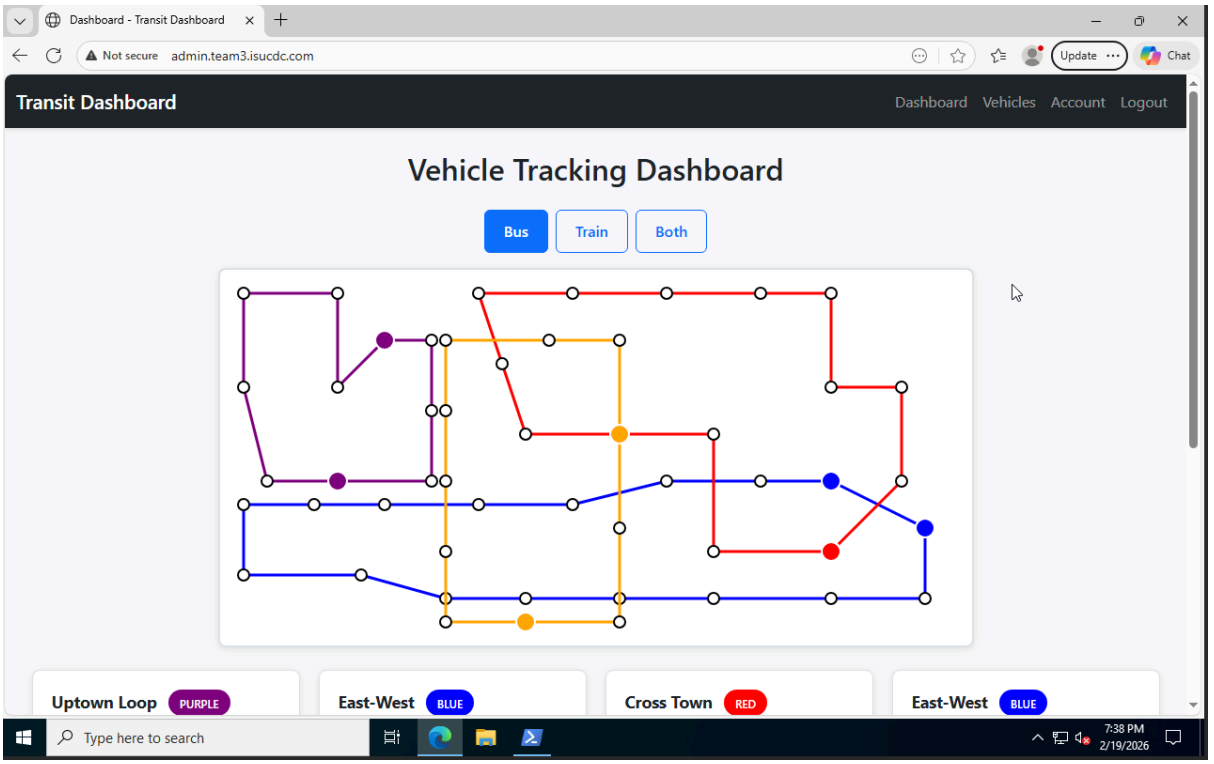
Logging Into the Admin Website

* Only Transit Admins can access and make changes on the Admin Website

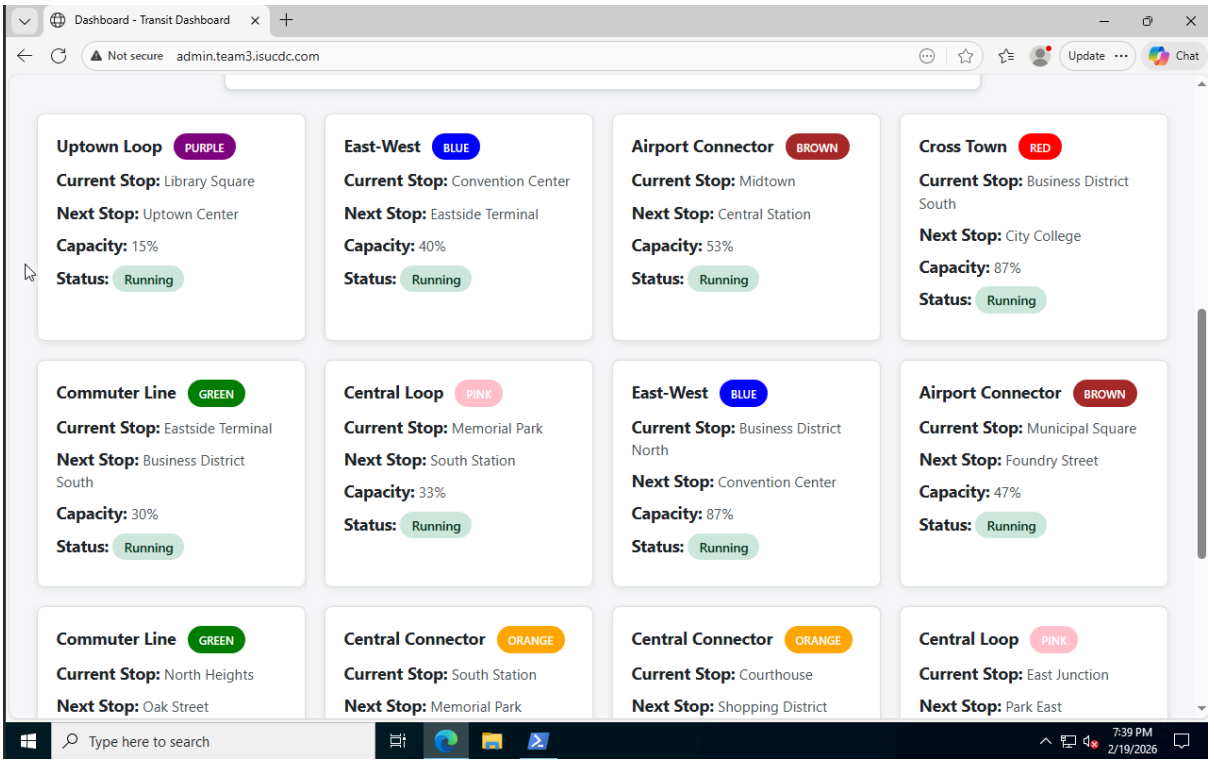
1. First, follow the steps here to access the admin website. This will take you to the following page.



2. To login to the website enter your username and password. Then select the login button.
3. This will take you to the Vehicle Tracking Dashboard. Here you can see the active routes.

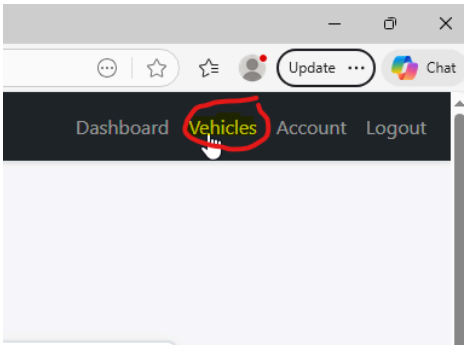


4. You can filter the routes that are shown by clicking the blue buttons under Vehicle Tracking Dashboard. This will allow you to filter by buses, trains, or both.
5. If you scroll down you can see more information about each route. Here it will show the route name, the current stop, the next stop, the capacity of the bus or train, and if the route is currently active.

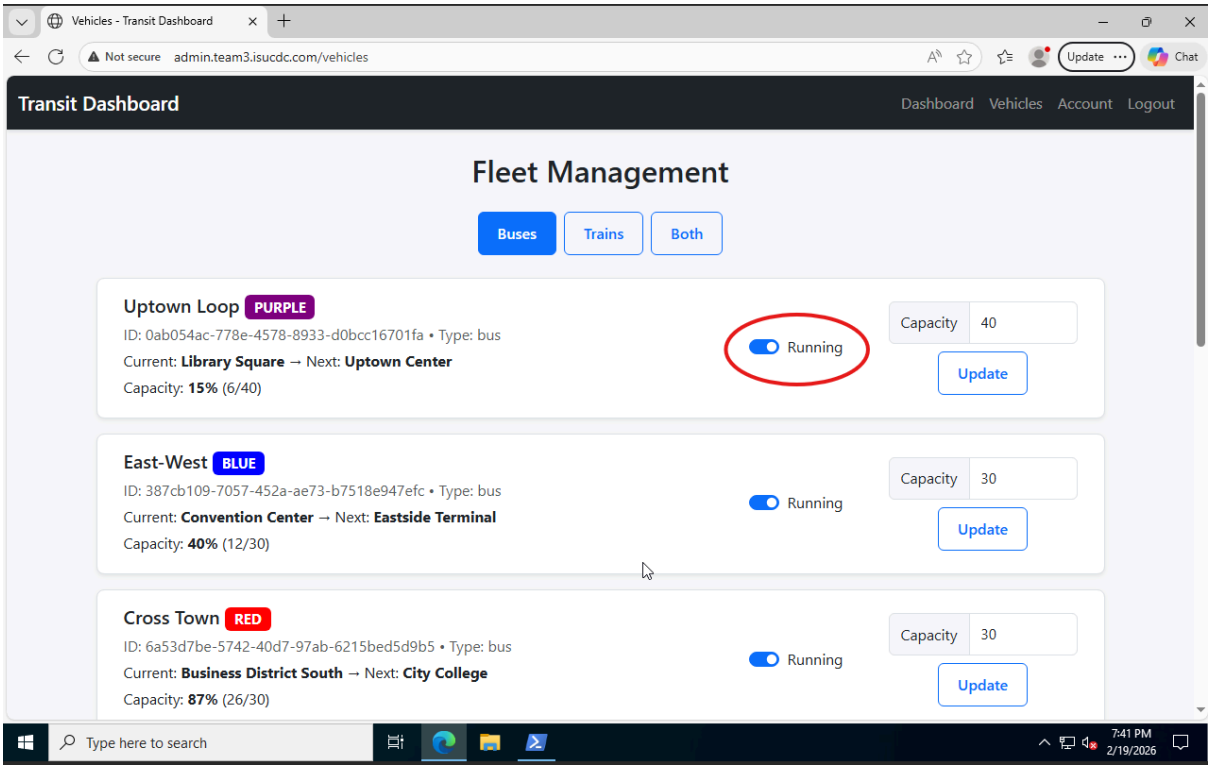


Accessing and Changing Fleet Management

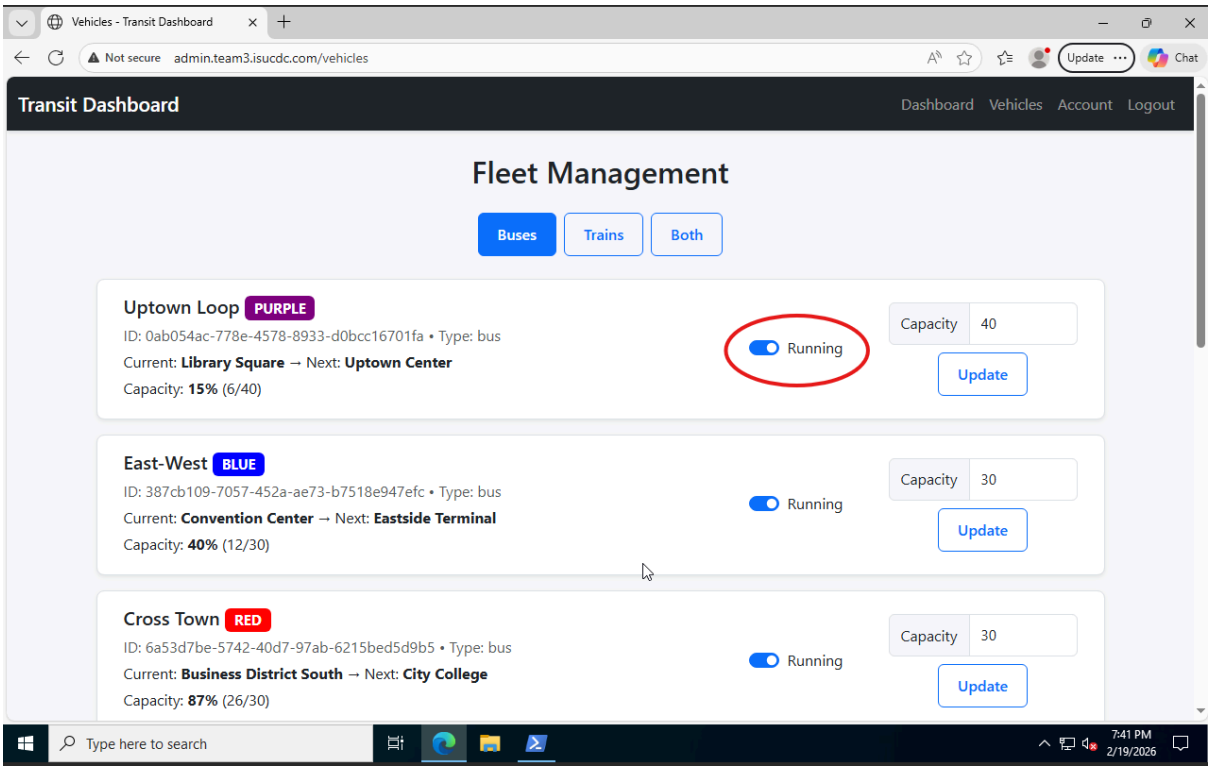
1. First if you are not already logged into the admin website, follow the steps here to login to the admin website.
2. To access Fleet Management, click the Vehicles button in the right hand corner.



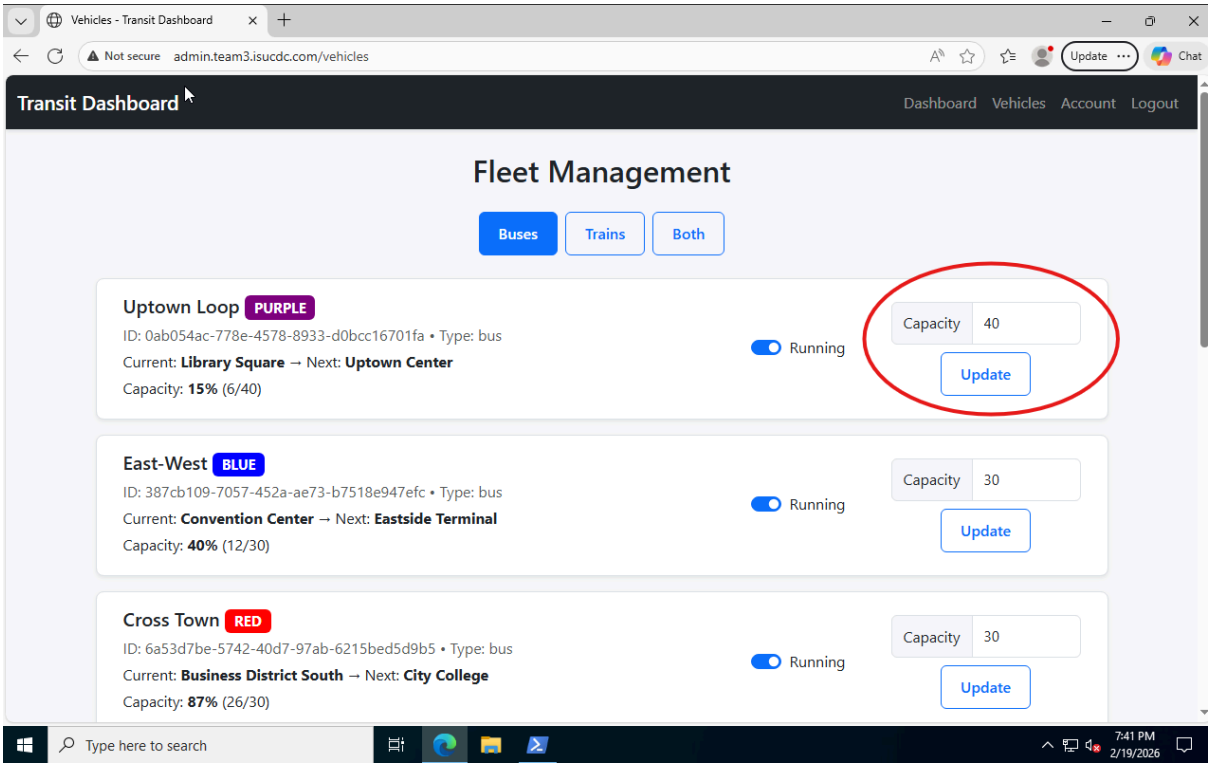
3. In Fleet Management you can filter your view by buses, trains, or both by clicking the blue buttons under Fleet Management.



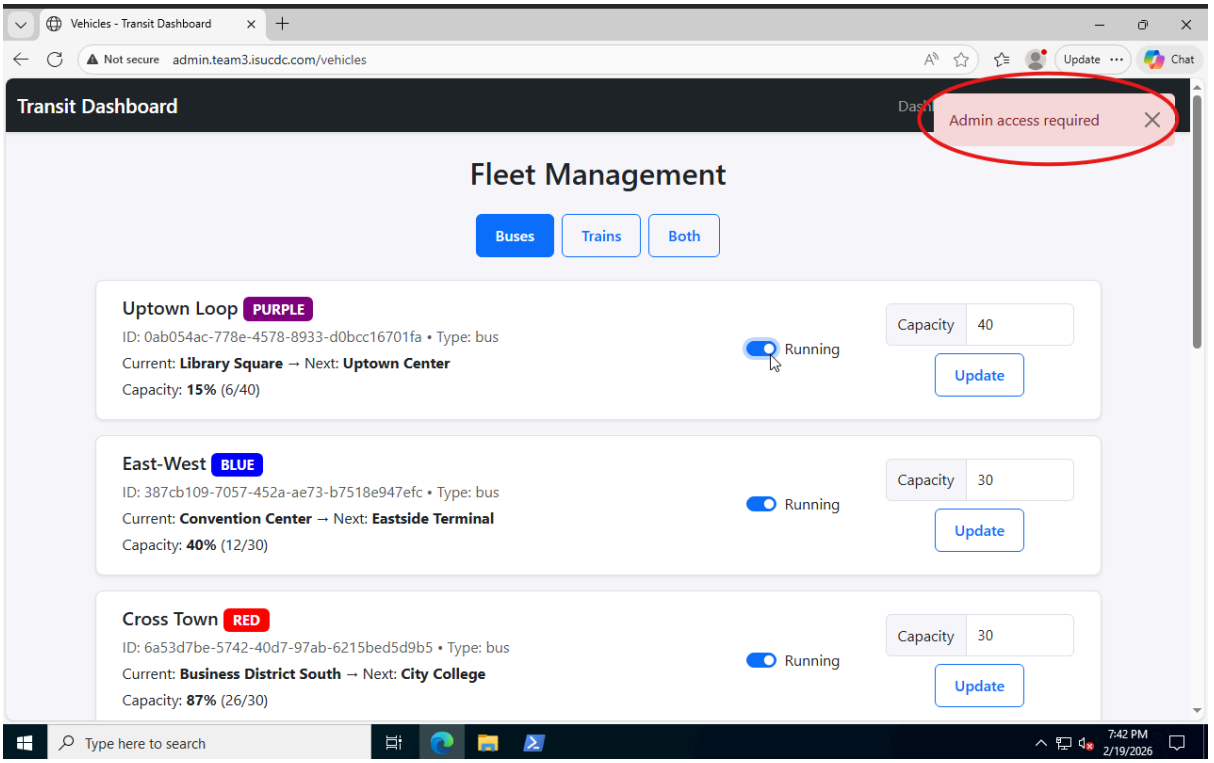
4. Fleet management shows information about the different routes. It will show you the route name, color, ID, current stop, next stop, and capacity.
5. To edit a route, find the route you would like to edit. Here you can set whether a route is active by checking or unchecking the blue check next to Running. You can also set the vehicle's capacity by typing in the box next to capacity.



6. Once you have made the changes you would like, click the blue update button to enforce them.

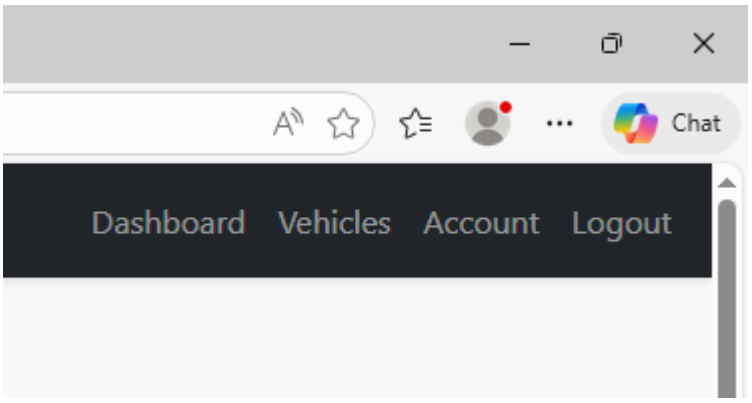


7. If you are not a Transit Admin you will receive an error that you do not have the required privileges to make changes.

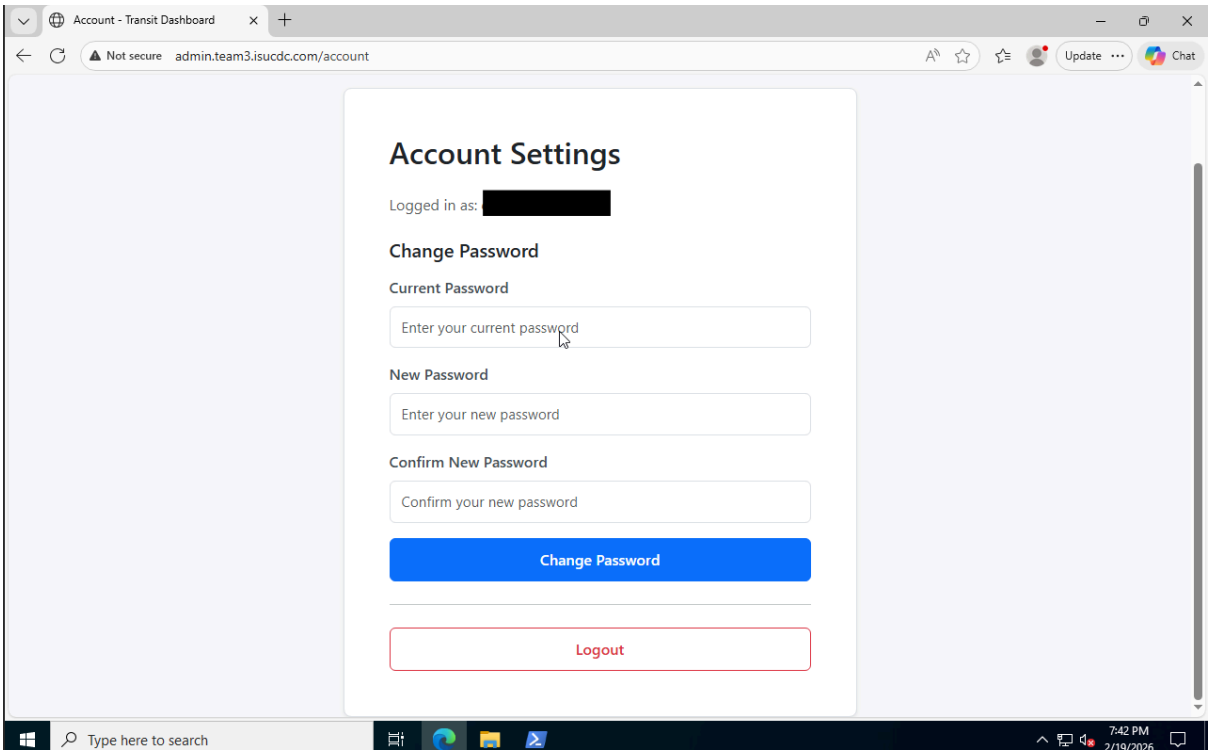


Changing Your Password on the Admin Website

1. If you are not already logged into the admin website, follow the steps here to login.
2. Next, in the right corner click the account button.



3. This will take you to a page where you can change your password. To change your password enter your current password, new password, and confirm your new password. Then click the blue Change Password button to change your password.

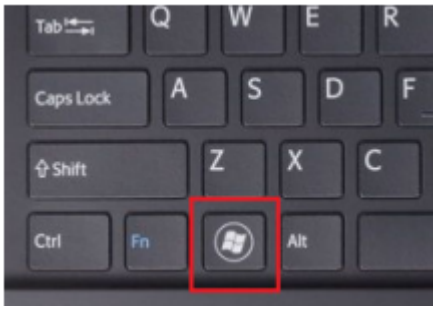


Administration of AD, Tickets, and AdminUI via RDP

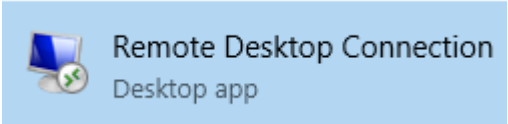
* For any issues with the accessing AD, Tickets, and AdminUI machines contact - ###-###-####

Accessing AD, Tickets, or AdminUI with RDP (Remote Desktop Protocol)

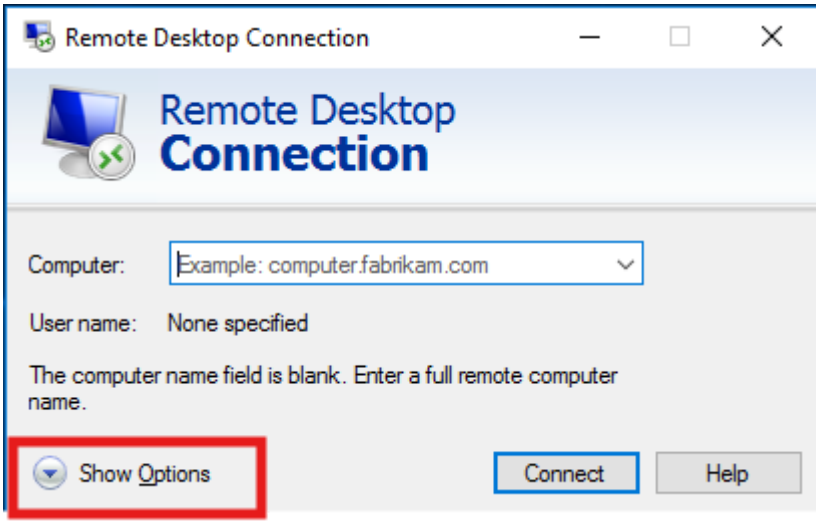
1. First, press the Windows key located at the bottom right of your keyboard.



2. In the search bar that pops up type in rdp.
3. Then click the Remote Desktop Connection application that pops up.

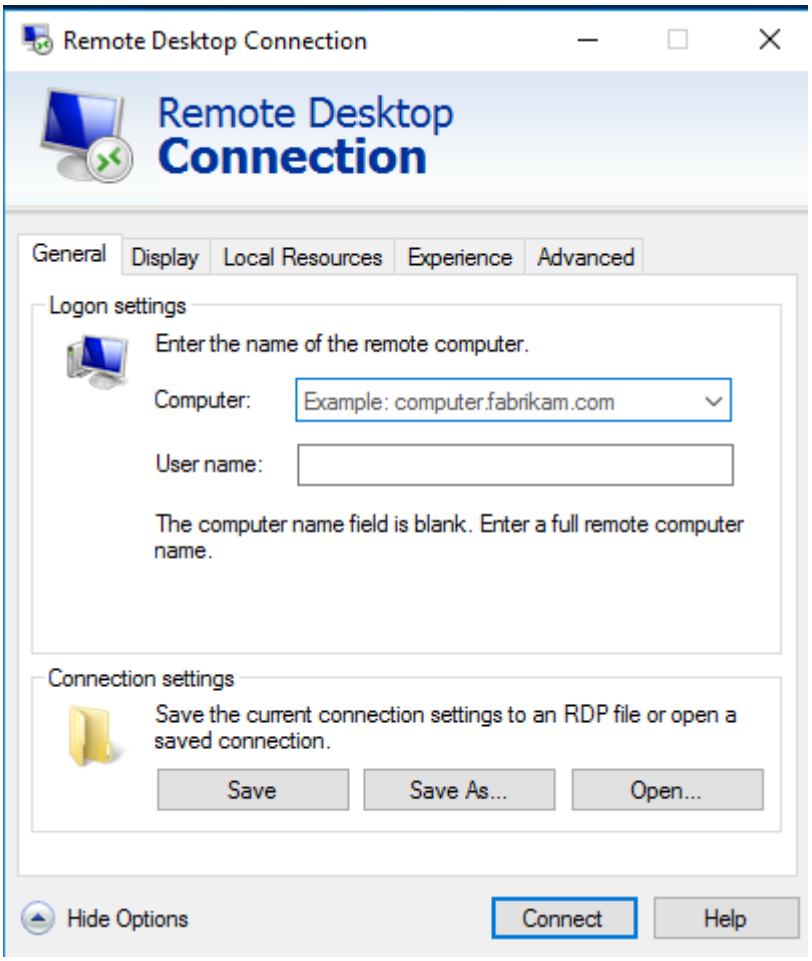


4. This will open the remote desktop connection box. Click show options to see the entire box.



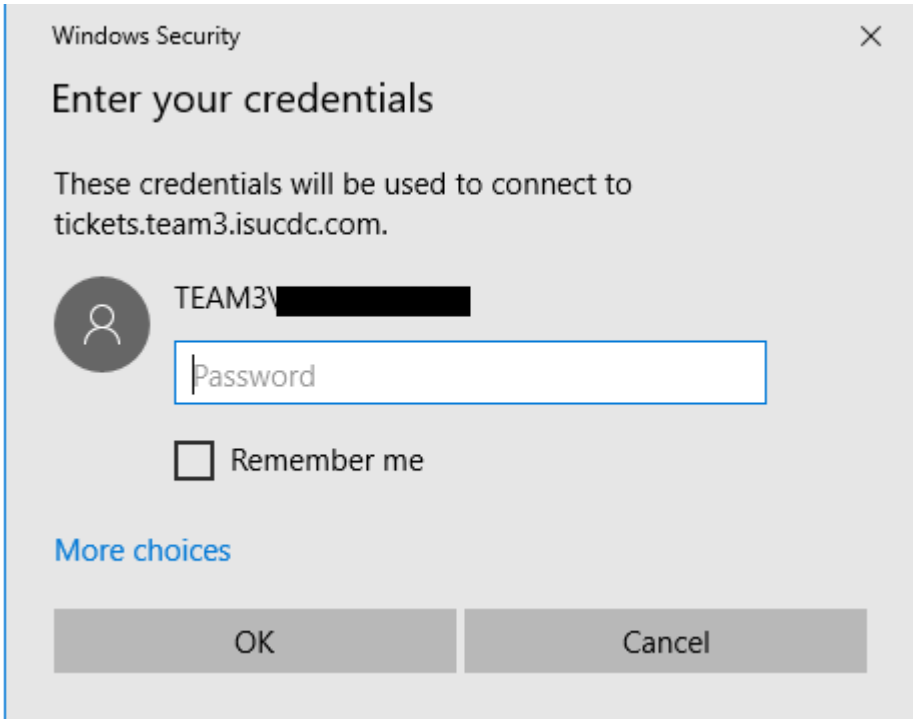
5. In the Computer box you will type in the following computer address.
    a. To connect to the AD server enter ad.team3.isucdc.com. Only IT Administrators will be able to RDP into the AD machine.

b. To connect to the Tickets machine enter tickets.team3.isucdc.com. Only IT Administrators and Ticket Maintenance will be able to RDP into the Tickets machine.
c. To connect to the AdminUI machine enter win-gvcavb1e38t.team3.isucdc.com. Only IT Administrators will be able to connect to the AdminUI machine.

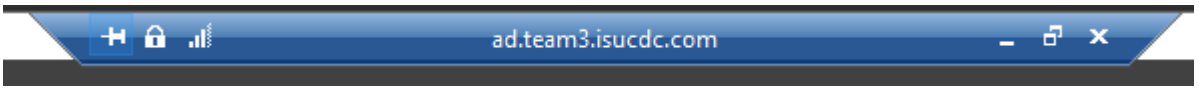


6. In the Username box type in your username.

7. Then press connect and it will prompt you to enter your password.



8. You will know you have successfully logged in when the blue bar below is at the top of the screen.



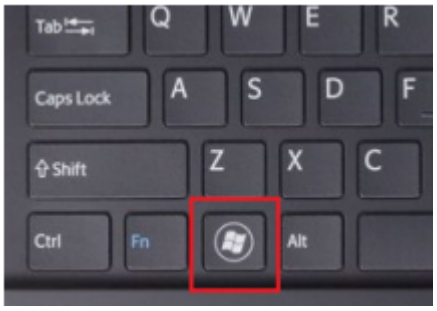
Administration of Management Backend and WWW via SSH

* For any issues with the accessing Management Backend or WWW machines contact - ###-###-####

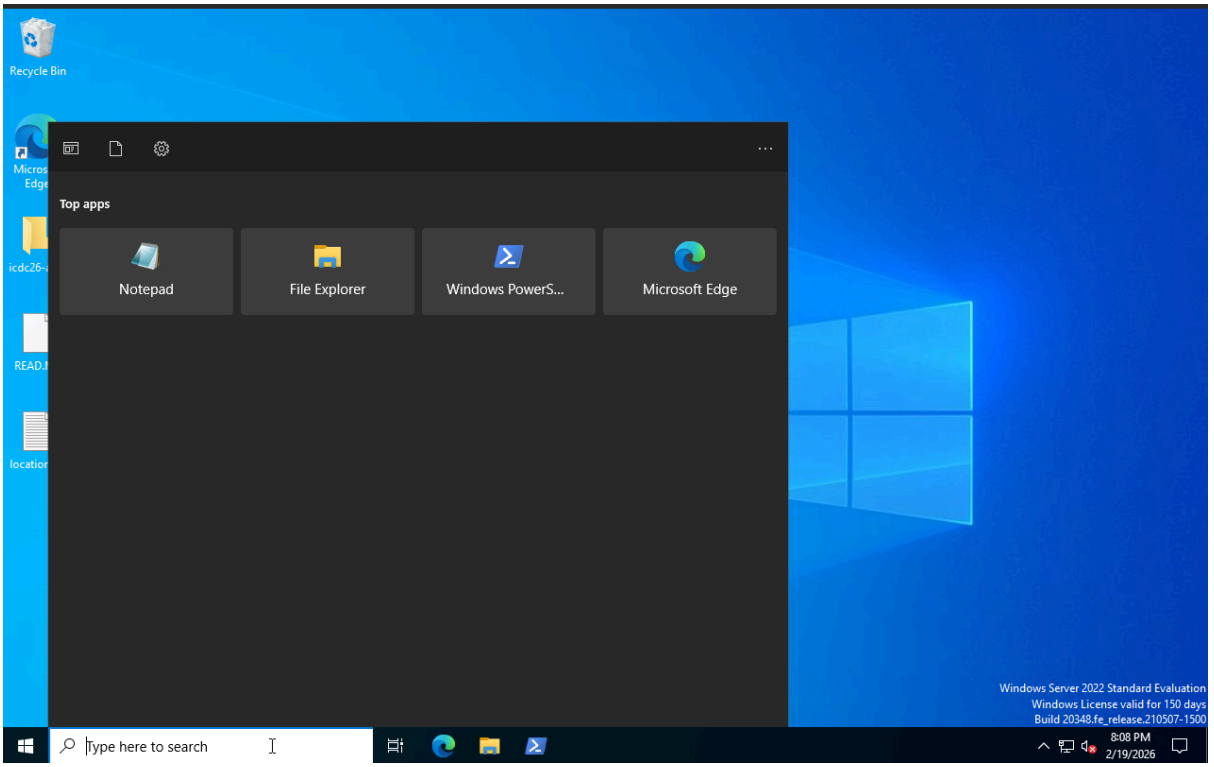
Accessing Management Backend and WWW with SSH

* Only IT Administrators can SSH into the Management Backend and WWW machines

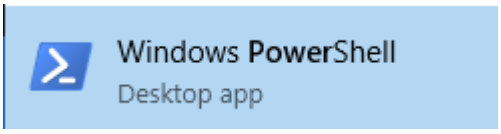
9. First, press the Windows key located at the bottom right of your keyboard.



10. This will cause a search bar to pop up. In this search bar type powershell.



11. Then click the Windows PowerShell application. This will open a shell you can use to SSH.



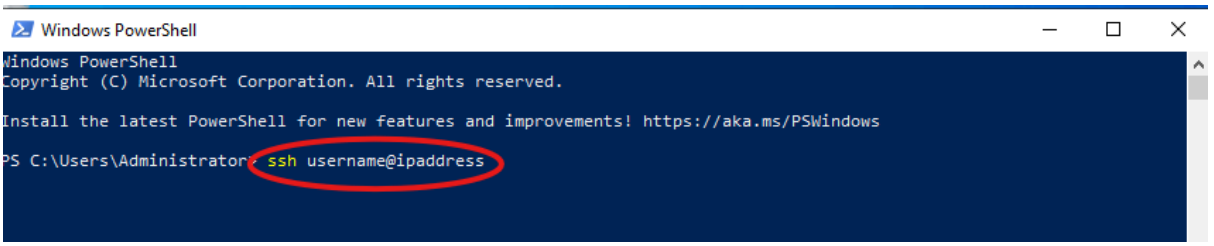
12. In the powershell application type ssh followed by your username@the ip address you are trying to connect to.

    For the Management Backend machine it will look like

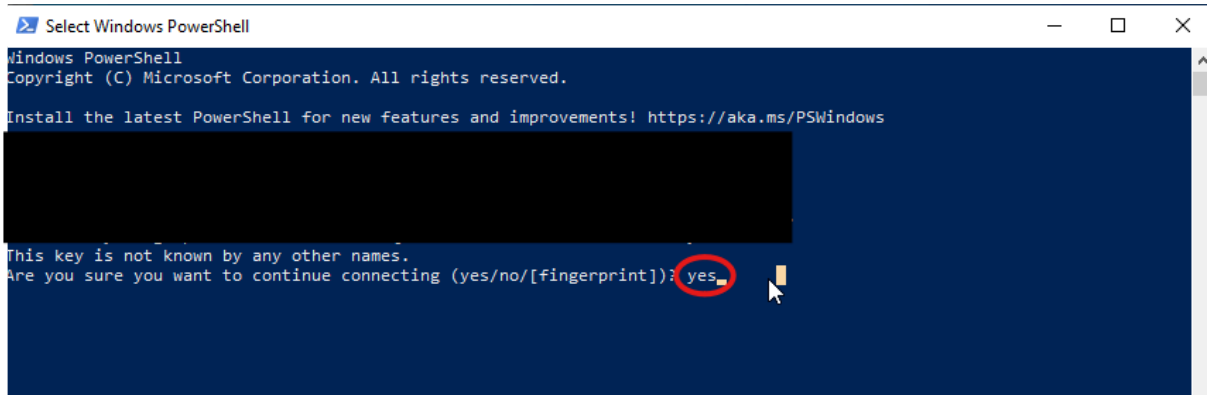
    ssh username@201.203.200.30

    For the WWW machine it will look like

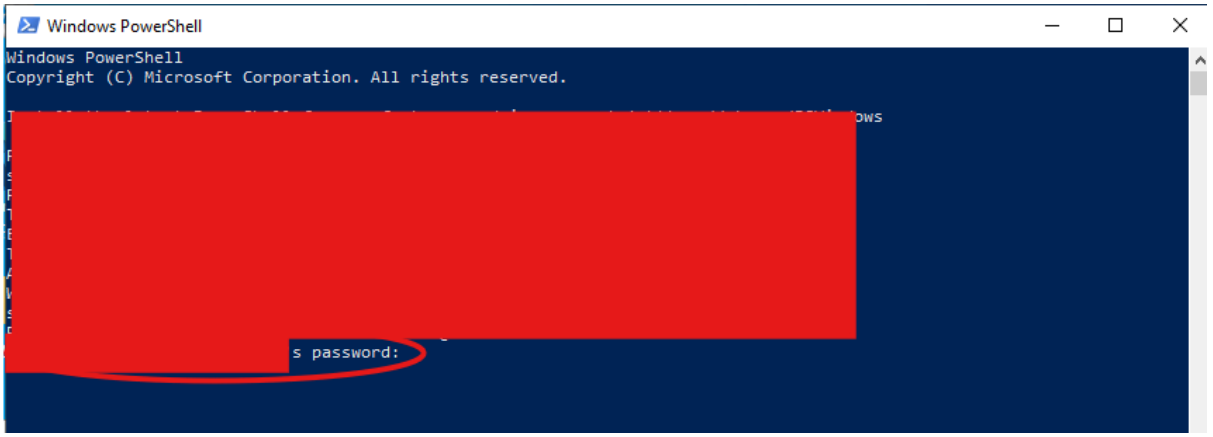
    ssh username@201.203.200.50

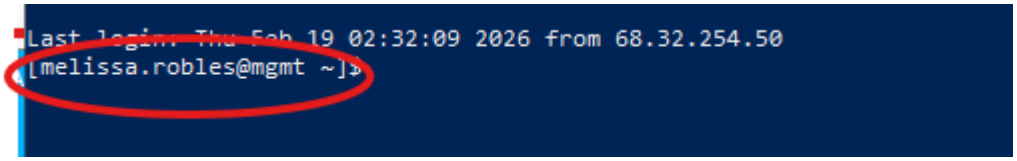


13. This will pop up asking if you want to continue connecting. Type yes and press enter to continue the connection.



14. Now type in your password and press enter. Note you will not be able to see your password.





15. When you are successfully connected to the machine it will look like this.
