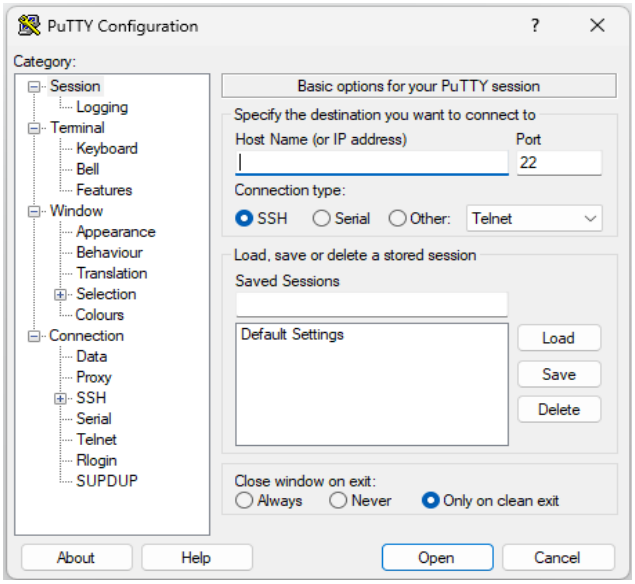
Administration of MGMT/WWW via SSH (Administrators Only)

To do general administration tasks on the Mgmt or WWW (Backend and Frontend) machines, we have provide SSH access to the administrator accounts: melissa.robles and roger.cox .

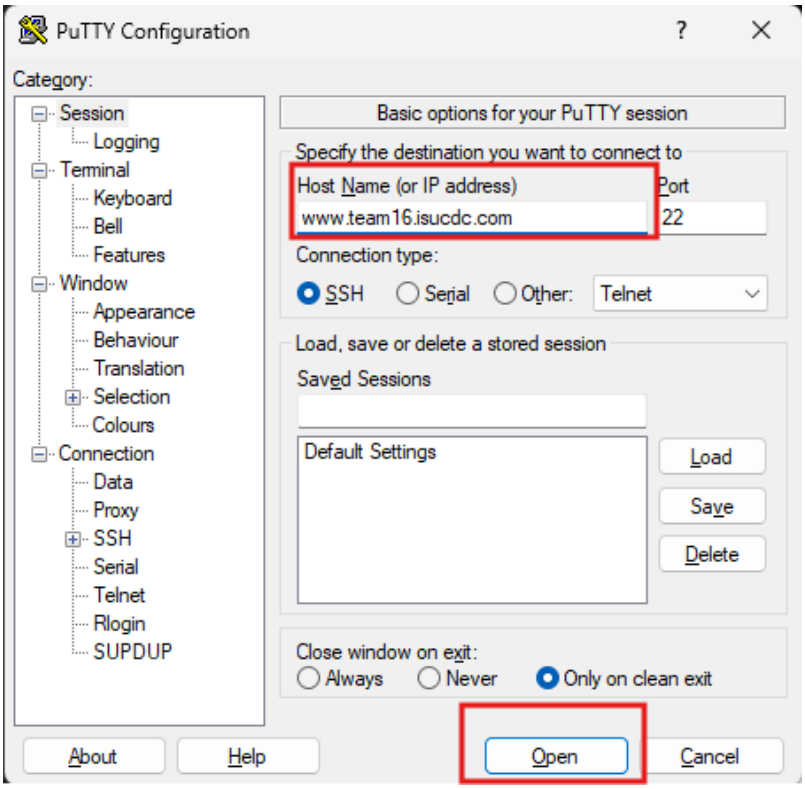
Requirement: You must have Putty or some other SSH client installed to perform this task. You may download and install Putty from: https://www.chiark.greenend.org.uk/~sgtatham/putty/latest.html

1. Open the Putty application



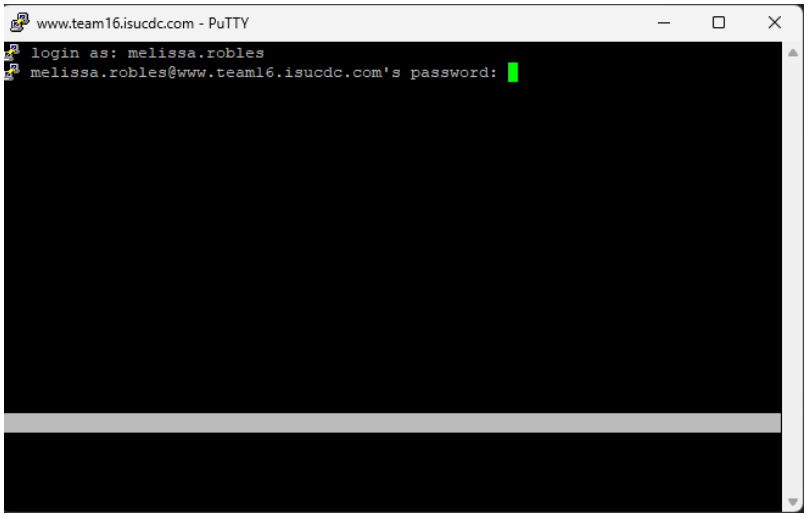
Putty Application

2. Input the domain name or IP address of the server.
   168.84.5.30 – mgmt.team16.isucdc.com
   168.84.5.50 – www.team16.isucdc.com



Desired Host input on the Putty Application

3. Input your credentials (Example below)



Input your credentials as shown in the picture above

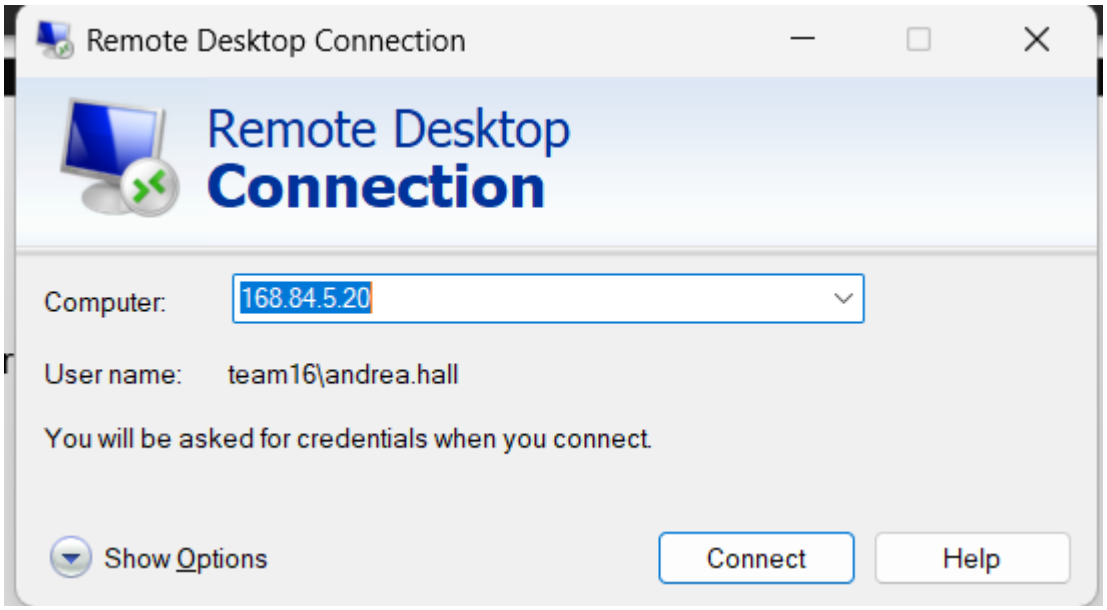
4. After authentication, you may continue to administrate the server.

RDP Access (Windows Machines)

Note: This part is for Administrator use only.

In order to administer our Windows machines, it is required to have a RDP client installed on your device.

1. To connect to any of the Windows machines, open the Remote Desktop Connection client built-in into windows and input the IP address or the hostname of the host



Input Host in the "Computer:" field

2. Input your admin credentials and continue performing your tasks in the device.
