Introduction

Welcome to Team 5 (CDC Team 24)'s first wonderful intrusion report. We hope you enjoy. In this gameshow, we review our logs and what has been going on and decide: HAVE WE BEEN HACKED! Enjoy the journey, folks!

Transit Flags Lost

Unfortunately, we lost two flags due to a vulnerability we missed in the backend. It was possible, without logging in, to change details about the vehicles. A user disabled all vehicles, and queried the flag, which meant we lost two flags, and all vehicles were put offline.

Access Attempts

All machines have evidence of brute-force attempts. The following table contains the attempted usernames to log in and the machines attempted:

Username	AD	TICKETS	MGMT	ADMIN	WWW
Administrator	X				
blue_flag	X				
cdc			X		
andr.hall		X			
games					X
joann.wilson	X				
kil.roy	X				
krystal.gray	X		X		X
leslie.brady	X				
michael.miranda	X		X		X
root			X		X
scrat					X
taco			X		X

Fortunately, they all failed to log in.

Assessment of Impact

We are confident, from the above logs, that nobody logged into our machines, which is awesome. However, disabling all the transit in town would be disastrous, which means overall, this is not a great situation to be in.
