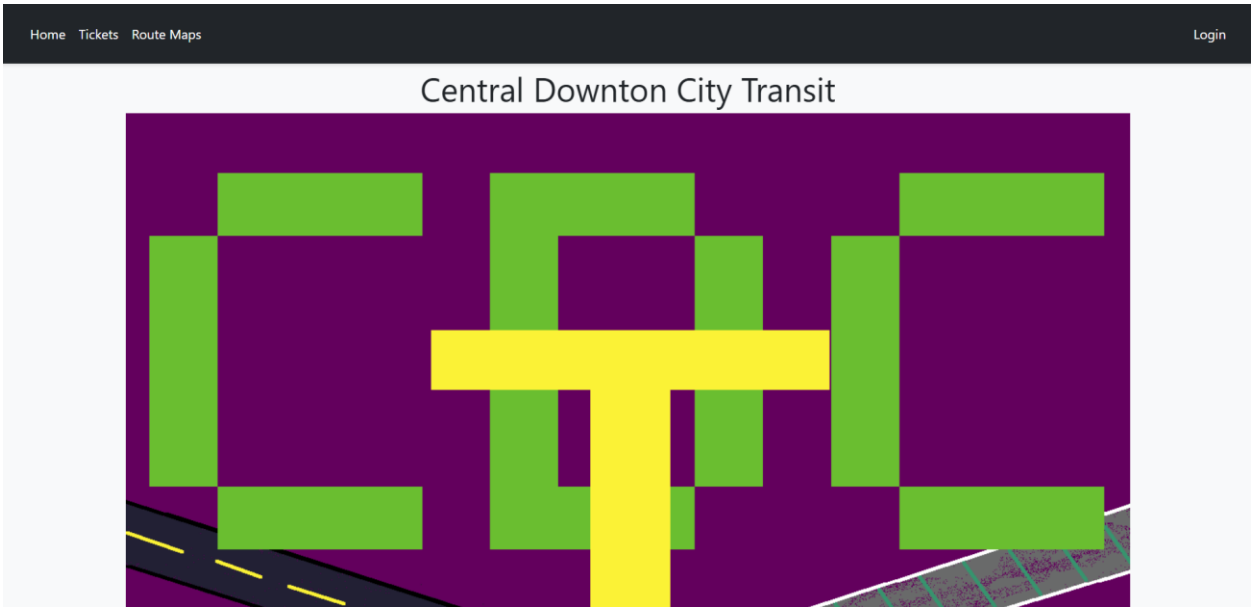
Accessing the Application via VPN

The Central Downtown City Transit (CDCT) application is accessible only through a VPN connection for security reasons. Follow these steps to connect to the VPN and access the website.

Note: You must have a VPN client installed (e.g., OpenVPN). Contact the green team administrator for VPN configuration files and credentials.

1. Open your VPN client software.
2. Import the provided VPN configuration file (e.g., cdct.ovpn).
3. Enter your VPN username and password when prompted.
4. Connect to the VPN. Once connected, your device will be on the internal network.
5. Open a web browser (e.g., Google Chrome or Firefox).
6. In the address bar, type the IP address: https://64.91.37.50
7. This will take you to the main page of the CDCT website, featuring the CDCT logo in green blocks on a purple background with a road illustration at the bottom.



Login and Sign Up

The application supports user authentication. If you are an existing user, log in. If not, sign up for a new account.

Login to the Site

1. From the main page, click on "Login" in the top right navigation.
2. You will be directed to the login page, which features a blue circular logo at the top, followed by fields for Username and Password.
3. Enter your username in the "Enter Username" field.
4. Enter your password in the "Enter Password" field.
5. Click the "Login" button to access your account.
6. If you wish to cancel, click the "Cancel" button.

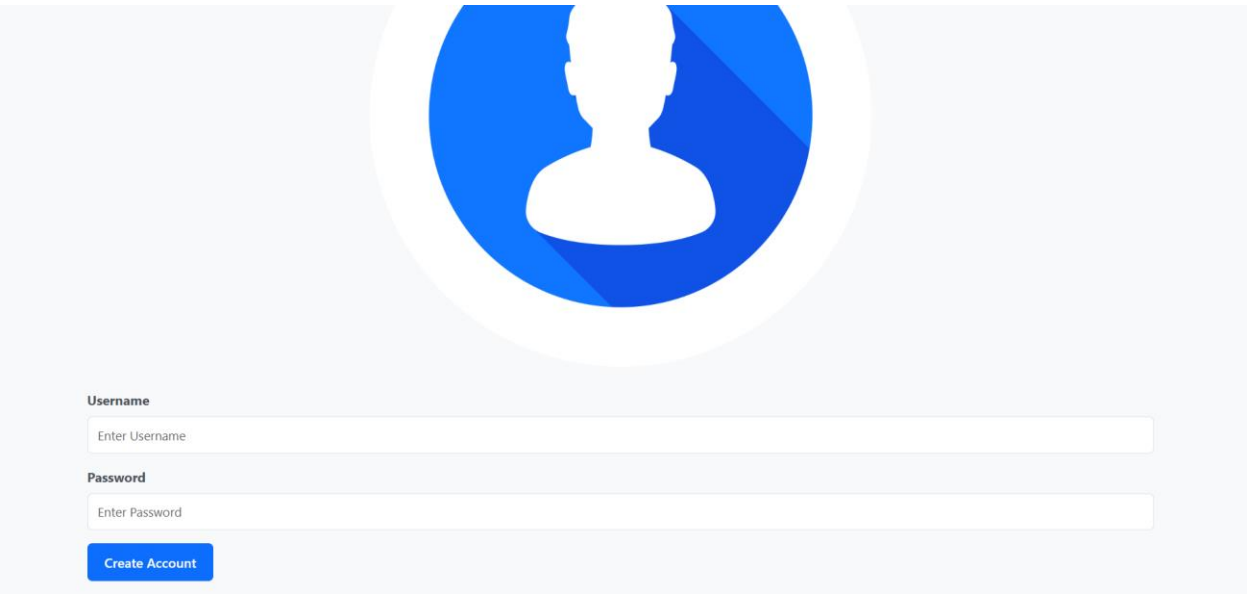
Sign Up for a New Account

1. From the login page, click the "Signup" button at the bottom.
2. You will be prompted to enter details for a new account (username, password, and possibly other information).
3. Complete the form and submit to create your account.
4. After signing up, you can log in using the steps above.

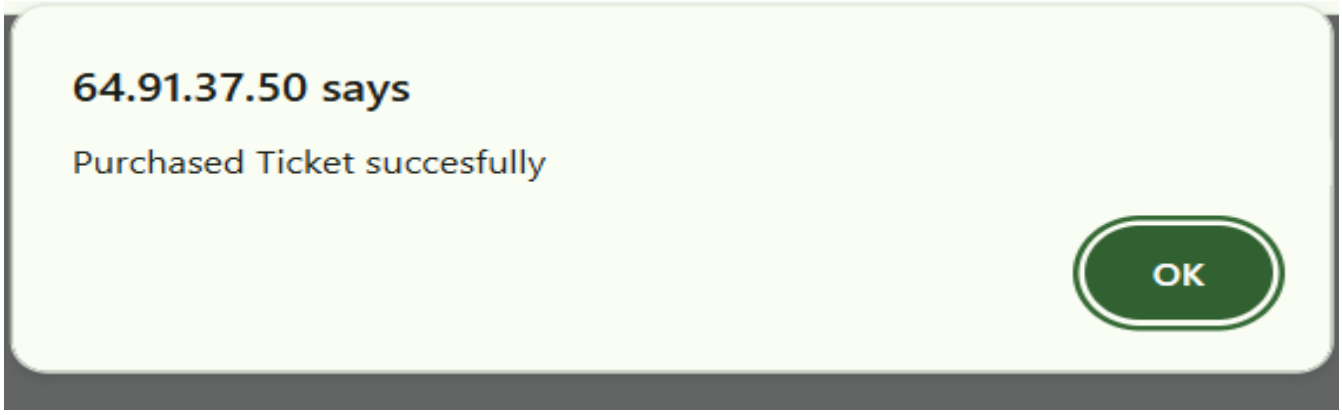


User Features: Tickets

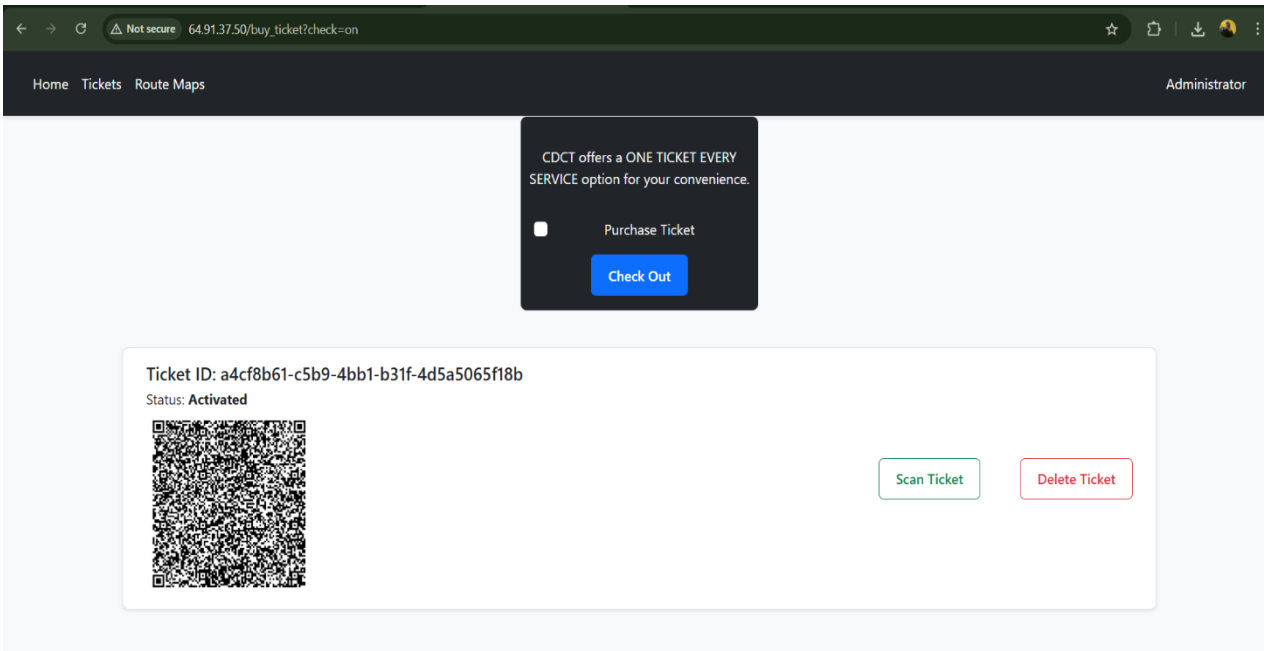
Once logged in, users can purchase, activate, scan, and delete train tickets. The application offers a "ONE TICKET EVERY SERVICE" option for convenience.

Purchasing a Ticket

1. From the navigation menu, click on "Tickets."
2. You will see an option to "Purchase Ticket" and "Check Out."After buying the ticket a success message appears like in the picture below:



3. The ticket details will appear, including Ticket ID (e.g., 4acFb861-c5b9-4bb1-b31f-4d5c505f1b), Status: Activated, an Activated, and a QR code.



Activating and Scanning a Ticket

1. On the ticket page, ensure the status is "Activated."
2. Use the "Scan Ticket" button to validate the ticket (e.g., via a mobile app or scanner).

Deleting a Ticket

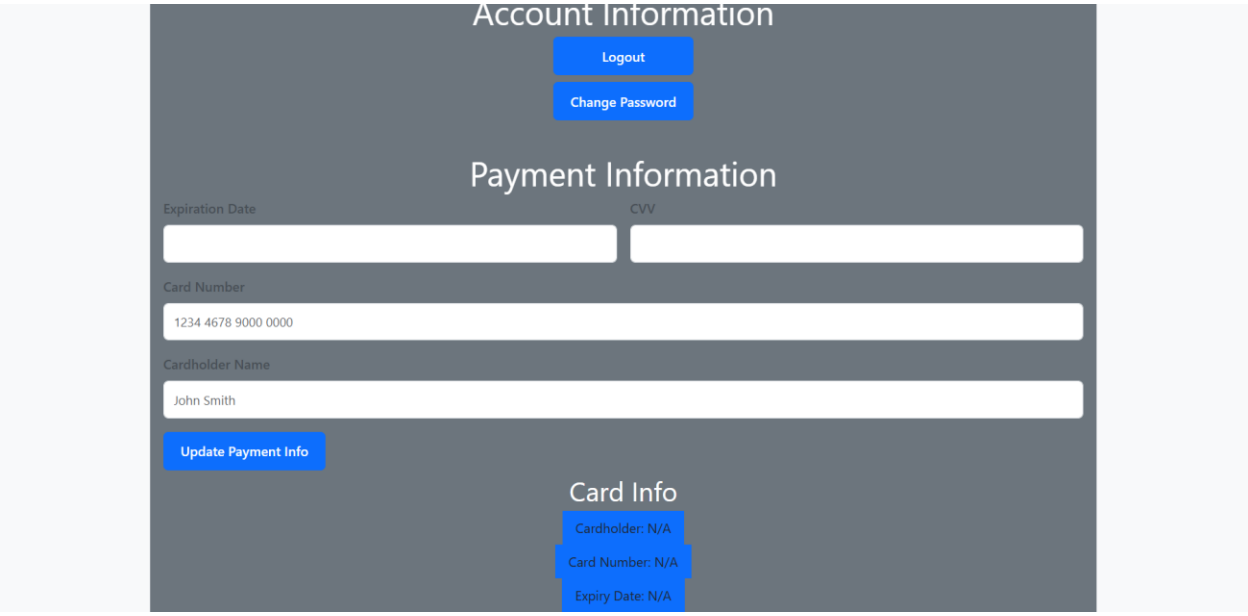
1. On the ticket page, click the "Delete Ticket" button to remove an unused or expired ticket.

Profile Management: Update Payment and Change Password

Users can manage their profile, including updating payment information and changing passwords.

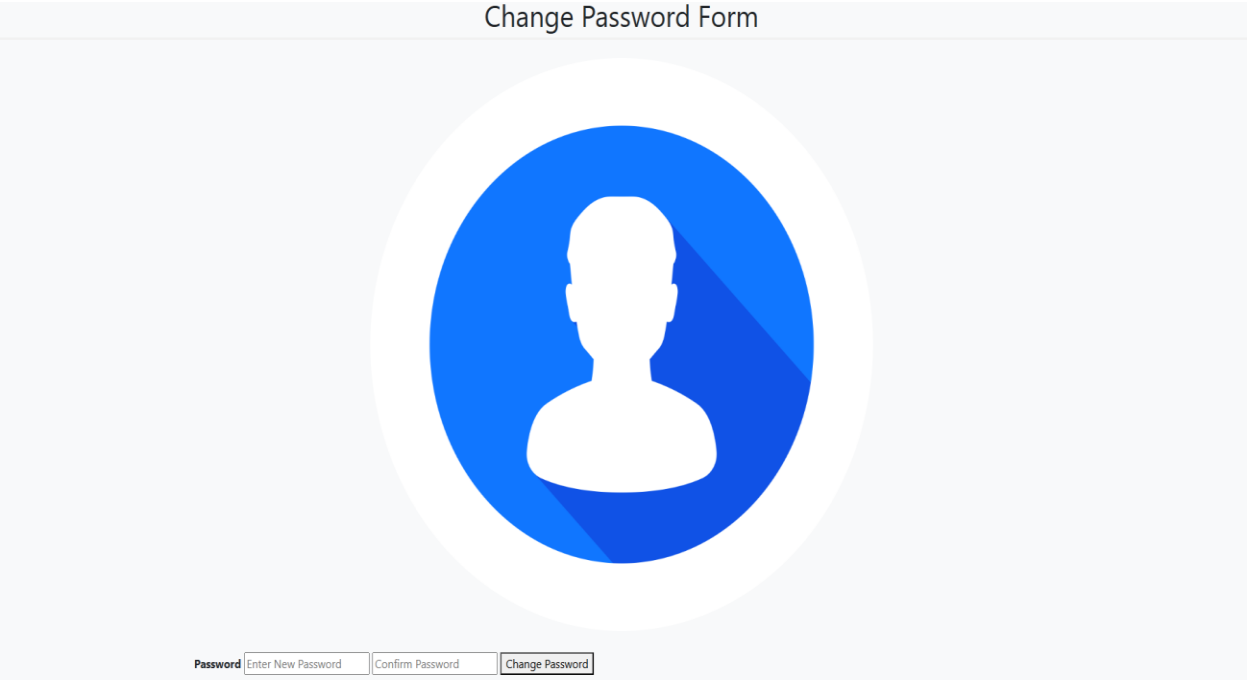
Update Payment Information

1. From the navigation menu, click on "Profile" or the user icon.
2. You will see the Account Information section with options for Logout and Change Password.
3. Below that, the Payment Information section displays fields for Expiration Date, CVV, Card Number (e.g., 1234 4678 9000 0000), Cardholder Name (e.g., John Smith).
4. Enter or update your payment details.
5. Click "Update Payment Info" to save changes.
6. There may also be a "Card Info" summary below showing masked details (e.g., Cardholder: asd asd, Card Number: 1234 1244 1234 1234, Expiry Date: 11/32).



Change Password

1. From the Profile page, click "Change Password."
2. You will be directed to the change password page, featuring a blue person icon logo.
3. Enter your new password in the "Enter New Password" field.
4. Confirm it in the "Confirm Password" field.
5. Click "Change Password" to update.



Administration of the System

Note: This section is for Administrators only.

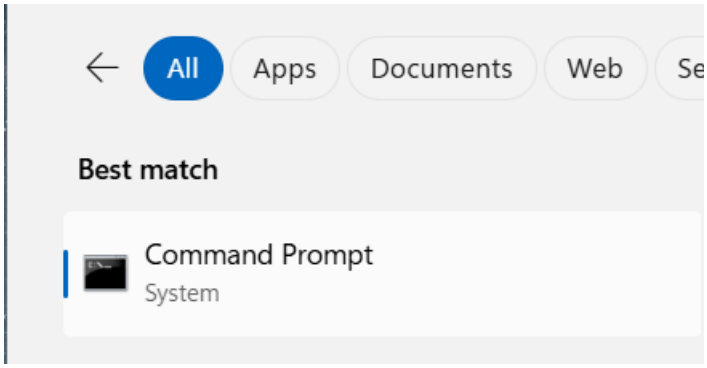
The CDCT (Central Downtown City Transit) application is deployed across **4 virtual machines**:

- 2 Windows VMs
- 2 Linux VMs

Administrators may access these VMs for maintenance, updates, troubleshooting, or configuration changes.

On Windows (using Command Prompt or PowerShell):

1. Open **Command Prompt** or **PowerShell** (search for "cmd" or "powershell" in the Start menu).



2.Use the built-in OpenSSH client to connect.

3. Type the following command and press Enter: ssh cdc@64.91.37.30,After that it will ask you for a password type the Administrator password.

```
cdc@mgmt:~
Microsoft Windows [Version 10.0.26100.7840]
(c) Microsoft Corporation. All rights reserved.

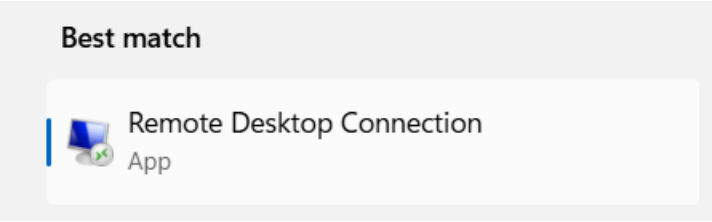
C:\Users\User>ssh cdc@64.91.37.30
cdc@64.91.37.30's password:
Activate the web console with: systemctl enable --now cockpit.socket

Last login: Thu Feb 19 16:50:18 2026 from 199.100.16.101
[cdc@mgmt ~]$
```

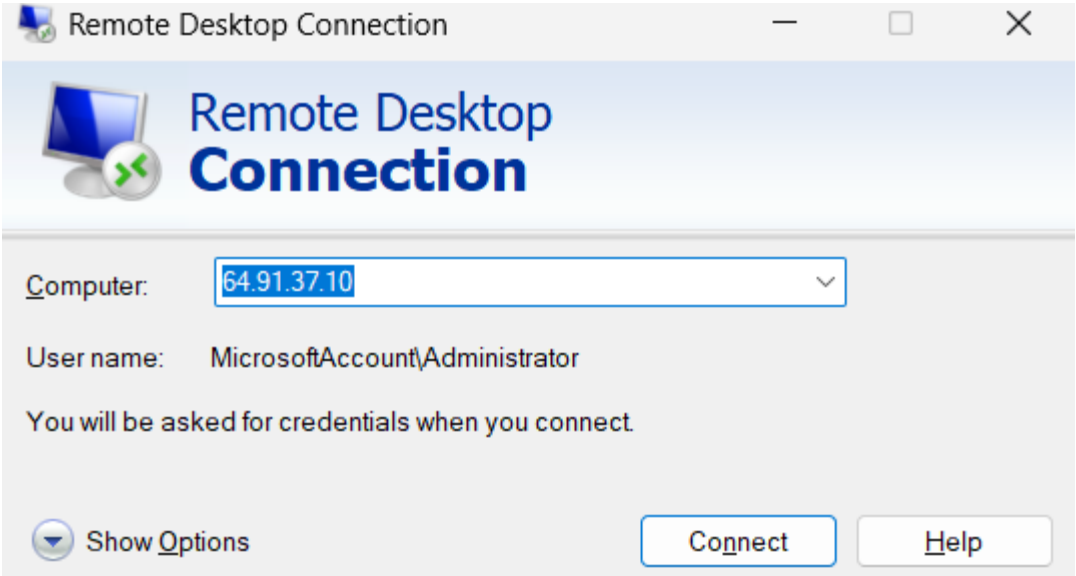
1. f it's your first connection, you will see a warning about the host key. Type yes to continue and add it to known hosts.
2. Enter the password when prompted (or use key-based auth if set up).
3. You now have a terminal session to the Linux VM for administration.

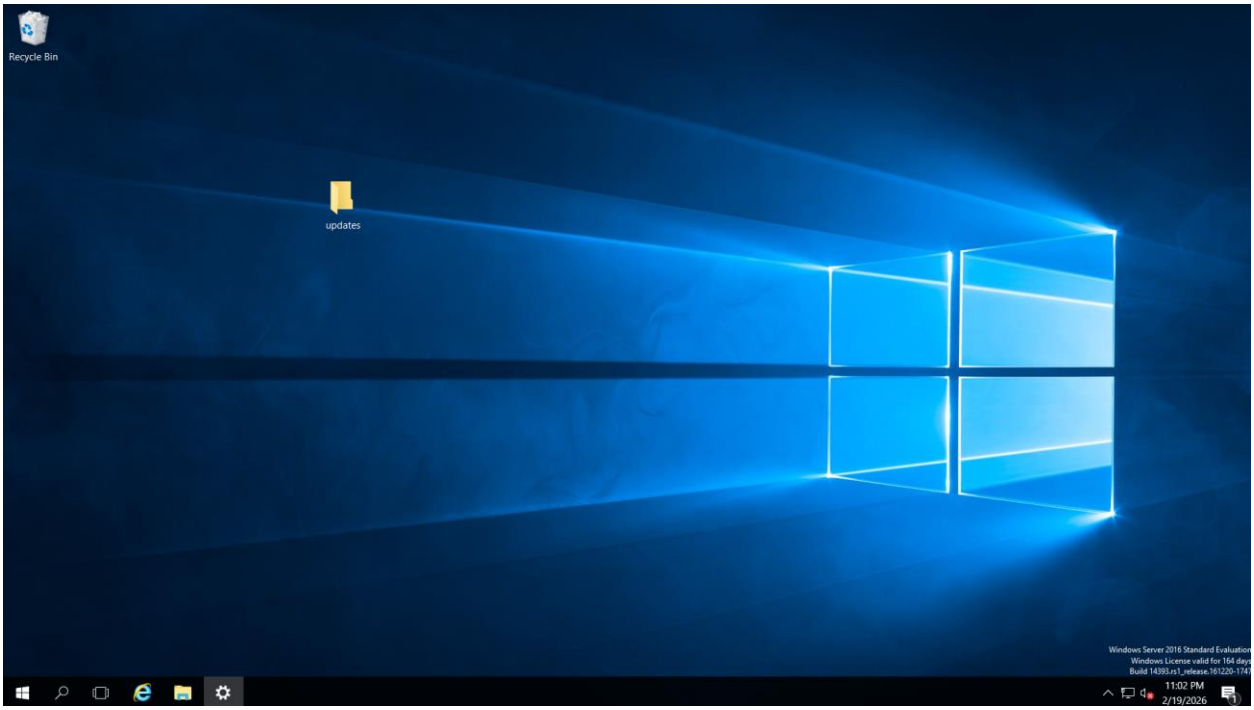
Accessing VMs via RDP

1.On your Windows machine, search for and open Remote Desktop Connection.



2.In the Computer field, enter the IP address or hostname of the Windows VM (provided separately).After that the password,and the page will open.





Same steps should be followed for Ticketing Machine (tickets), but instead of 64.91.37.10, the ip should be: 64.91.37.20. And to access Admin User Interface (admin) VM, ip is: 64.91.37.40.

Windows VMs can also be accessed from Linux using Remmina, using these steps:

1.Install Remmina if not already present (e.g., sudo apt install remmina on Ubuntu/Debian).

2. Open Remmina.

3. Click the "+" to create a new connection profile.

4. Set Protocol to RDP.

5. Enter:

   - Name: e.g., CDCT Windows VM
   - Server: the Windows VM IP address
   - Username: admin username (e.g., Administrator)
   - Password: (optional, can enter later)

6. Go to Advanced tab if needed for color schemes or other preferences.

7. Click Connect.
